Do you need to have a pre purchase of the gems and if so can you use it over and over or just once off one purchase

Cheers

Correct,

Example:

I make a \$10 purchase. Recover it 20 times
\$200 worth in a single day.

Notice: Some States are patched!

Rask0 - August 6, 2014, 7:08 pm

I was waiting to see this come out looks nice GLWS,also is there a limit to how many times we can recover?

Spam404 - August 6, 2014, 7:09 pm

So basically with the 1 month access, does the person get to keep recover it as many times as you want off one purchase?

CRT - August 6, 2014, 7:16 pm

So if I buy this for \$7 I can purchase £69 worth of gems and have the money refunded?

Munch - August 6, 2014, 7:24 pm

You get 2 recoveries a day no matter what plan you buy.

The Lifetime plan will be coming soon with a max of 11 recoveries.

(Aug 6, 2014 07:16 PM)Curt. Wrote: [\[CITE\]](#) So if I buy this for \$7 I can purchase £69 worth of gems

and have the money refunded?

You can get it Recovered up to 2 times a day, there is no max amount it can still be done.
It can be paid with anything and it still be recovered.

Do they still keep the money but you get 3X the normal amount of gems? Also you said you can only do it 2X per day - is this for each purchase, or for all purchases? Also when you showed your "wallet" you said you did that in one day, but then said that you can only use it twice a day, so I am confused. Can you please explain the process a bit more, as I am considering the lifetime membership or partnership via \$110 BTC if this is a sustainable method and is something that I would be able to use how I think you are saying one can use it. I just need more info. Thanks. I will add you on Skype as well.

-I can do it unlimited times, but for the buyers they can only do it twice a day to limit me getting spammed with request.

-I will be releasing an update that will give them 3 or maybe 4 times a day.

-Yes you get 3x the gems you normally started and the money back into your account's wallet/funds.

He use's his 'own tools' he says. After you put in your Email, Password, ID, & UID, it sends it to a server and he can view all of it. I don't trust it and shouldn't have from the beginning. Anyways, I don't know if this work as I have trust issue's with my password..

OP: You should tell people before hand that you will be logging into their account and viewing their password.

Is there any possible chance someone on iOS could get this? I'm SO SO interested in this! I'd pay extra for iOS.

I am correct in this; we purchase some gems, fill in our purchase email, order number and such, then you get us the money back up to 3 times in a day?

Also, could I use Bluestacks, run Clash of Clans, somehow activate/open my iOS village, purchase Gems, get the money back from this method/program and I would also have the gems on my iOS device?

this program will only take your information, and save it on a data server... Thus where 'Phase will see your information and Order ID then preform the PUBLIC REFUND METHOD via Google.

He's not supporting apple, because apple sends VERY detailed reports to your email. Thus revealing the "method"

I HIGHLY SUGGEST NO ONE BUYS THIS BOGUS PROGRAM...

ALSO: BE VERY CAUTIOUS. CURRENTLY HAS A SCAM REPORT OPEN ON HIM, HE WAS TRYING TO SELL THIS PROJECT AND INSTEAD SCAMMED THE GUY. HE CONTINUES TO DENY IT THOUGH.

Vouching for this service.

Most of these gems were got from this service. Just don't abuse and it should be fine. I'm taking a break before doing again to avoid any issues.

- For iOS, will you be needing our game center username and password?
- Is it likely we may get banned if we are a high level town hall?

Hello!

Just a pre purchase question: what's the difference between your method and simply asking a refund to Apple saying it is your kid who bought gems?

How can you be sure that your method can be done several times a day without Apple noticing?

I might buy the 1 week package but it's the first time I see a tool to get CoC gems so I don't know how it works

Thank you

My service doesn't take place in apple, also I know it can be done because I have done it for many members already and the method has a private exploit that won't be patched anytime soon. ?
