Thread: [Best Gaming Laptops? Budget = \\$2100](#)

GammaRay - August 7, 2014, 4:24 pm

Hey guys!

I've been looking everywhere for gaming laptops but not a clue which one to buy.

If you guys could recommend some that would be great!

Thanks,
GammaRay

MrKennyPowers - August 9, 2014, 2:18 pm

I'm surprised nobody has tried to help you yet. With that kind of budget you could get one hell of a laptop. Personally I'm a big fan of ASUS and MSI when it comes to laptops, but with that budget i guess you might be able find a good one from Alienware even if its potentially overpriced.

Here is one of the better laptops i could find without going over your budget from ASUS. Hopefully i helped a bit.

http://www.amazon.com/G750JS-DS71-17-3-inch-Gaming-GeForce-Graphics/dp/B00IEV85OU/ref=p_sdc1_t1_B00IAACWH6_B00IEV85OU

If you're able to increase your budget by \$150 this could also be an option.

If you want a gaming laptop i suggest it has windows 7 an ssd and 8-16 gb of RAM 8 is perfect 16 if just overkill but is needed if you do alot of rendering and a good gpu

alienwares are good because they offer all of that good stuff but ofcourse at a high ass price

and the ones this guy posted are nice but have windows 8 and dont have and SSD

issue with windows 8 is i see alot of complaints with games and applications on that OS than you do with 7

and a SSD will let you boot up games and your OS much faster.

so pretty much

Windows 7

8-16 GB RAM

SSD with 300+GB for games and OS

and a GPU 870m+ is preferred due to it will handle newer games and will have to upgrade much later

If you're willing to spend a few more bucks, this laptop has gotten some great reviews

I have MSI Ge70, Cost about 1500\$ about a year ago. Have been working flawless with everything i could ever need it. I would recommend for you the new MSI gaming series laptops.

Businesses - August 11, 2014, 9:45 am

2100 is too much you can get lot cheaper ones. Don't go for "best"...even "better" ones work more than expectations ?

Sector 11 - August 14, 2014, 2:00 am

in 2100\$ u will get alot options go with asus or try dell gaming series alienware

PoroPie - August 14, 2014, 2:03 am

I would go with a razerblade soooooo good.

Autopost - August 14, 2014, 2:06 am

Personally I spent about \$2,700 on my MSI and have NEVER regreted it.

Zeuzeu - August 15, 2014, 10:54 am

If you ended up ordering that laptop from amazon and have an account in good standing consider pulling a refund (contact amazon and tell them you received an empty box). Sounds lame but I do it every 60-90 days on high end orders and get refunded + keep merchandise (they will also offer an additional reship of item in lieu of refund). You won't have to play email tag or prove your case in any way.
