Thread: [Website Construction Helpdesk - Get help from one of the best!](#)

Vert0x - August 7, 2014, 10:28 pm

Well.

I see loads of members are struggling to build websites or have issues with them.
So I will be providing a free service for everyone who needs help.

Just post here with your question.
And I'll help!

Cheers!

Hi Sir! I need idea or help on how to start to build a website. Google adsense friendly site. As of now i don't have any niche idea. can you suggest any niche idea sir? I planned to build a flash game website but someone told me that flash game is over saturated. so, I decided to discard the flash game website. Hope you can give me ideas so that I can start building my website. I'm just new to building website, for sure I'll be back here for further assistance. Thank you!

Sign up for "Google Adwords", it will give you access to the keywords tool. You can find out good niches with it!

The DNS is the connection between your host & domain.

If the domain isn't correct; it won't connect.

Also add the domain to the web host.

When signed up for it, you should receive nameservers.

Add the nameservers & of you go!
