SIM-2015410 - August 8, 2014, 6:54 pm

Hello HF,

I recently coded a dox formatting tool. I intended to sell it for OMC in the OMC exclusives market, but so far I haven't sold it even once.

So I have decided to give away a few copies for free!

I still want to try and sell this product, so please do not leak it (that is why I have made this giveaway l33t/ub3r and HQ non upgraded members only. I am only giving out limited copies today, so first in first serve.

Original sales thread: <https://hackforums.net/showthread.php?tid=4380396>

(If you want to support omnicoin, please buy it from the thread)

Functionality: Add, rename, delete categories

Add, rename, delete elements Choose an element to be either value, image or extended information

Display the image you have added Save the dox to a custom .d0x file for later editing

Load previous doxxes from a .d0x file Export the dox in a formatted text file

Runs on .NET framework 2 for maximum portability and compatibility

So you decide who gets this depending on how "HQ" they are, yet you think spreading malware and doxing is hacking? <https://hackforums.net/showthread.php?tid=4329505>

That tutorial covers a lot of different aspects of hacking. A lot of people are finding it useful. What do you not like about it?

Basically, I am giving this tool to everyone at the moment.
