Vouch, user is rich. Has spent 3 digits on this forum today alone.

**yungselfiegod** - August 8, 2014, 6:58 pm

I have already been approved UB3R.

Sorry that my post doesn't have colors or a unique design, it's hard to type on mobile with my big fingers. :P

Hello, first off I would like to thank LLA for holding this amazing giveaway.

Now, starting my application I would like to address the point that if I am one of the several lucky winners, that would help me out tremendously as my laptop is currently broken so I use HF on mobile, and I have been for the past month or so. Getting upgraded would give me some relief and save me money so I can get it repaired.

I was on HF about a year before I made this account (not a multi, my account pruned) I was mostly lurking the site because I didn't have anything worth saying in most threads. I've learned a lot in the past five months of being on HF. I know I'm not the most active member, but I still try to give back to the community, whether it be giving advice in the Innuendo section or talking with someone and putting a smile on their face. In my opinion, that's a lot more powerful than \$0.10 giveaways for upgraded members.

I wouldn't like to put myself on a pedestal saying I deserve an upgrade more than another member because I don't know the situation that someone else is in. But, having said that I try to be as HQ as I can when posting.

I have a few giveaways planned for the future once things get straightened out for my family and I.

Once again, I would like to thank LL?. for giving me the opportunity to have my account upgraded a second time.

Very generous giveaway bro!

wish I could apply for ub3r already /;

**Chaunzie** - August 8, 2014, 7:00 pm

Hello, my name is Tropical Alien.

I have been on this thread for about 4 months now and absoutly love the amazing people here, all the negative people are a simple no.

But I like this forum alot and would like to share my life with it.

I love meeting new members and chatting with them on PM or skype they bring the inner me out so I could enjoy hackforums like a normal member!

I never applied for UB3R so this would seem a bit hard for me, but I feel as if UB3R would be a big step into joining a beast community which is what I really want and hope you could understand that!

I quite enjoying trolling around but being serious at subjects that are meant to be funny but I also like to be serious as if I would try my best to be the best UB3R out there, but here's my application and I hope you read it and thanks again for taking the time to read my paragraph and enjoy HackForums ?

Very nice giveaway LL?., Very generous of you!

Clearly I am already ub3r, but it would be cool if you gave out the gift award for ub3rs who are already upgraded.

Good luck to whoever wins an upgrade!

**Callmehellor** - August 8, 2014, 7:03 pm

Hello!

I believe I deserve this award because I am a HQ member and is on here all day. I have just started off only a few weeks ago but I am very interested and devoted to contributing to the community.

Over time I will contribute and gain respect, but the ranks will help me get there faster. I would also benefit greatly from it, as I would gain extra privileges and improve faster. I also love learning and helping people, as you can see in my posts, they are encouraging and detailed, especially for those in need of help. Also, I do not have any money to spend anywhere so this is my golden chance of becoming an upgraded member. Many thanks!

**Mons** - August 8, 2014, 7:11 pm

Hello OP,

This is a great giveaway and an amazing contribution towards the HackForums community.

Why do I deserve this?

Because I have been a member of HF for quite a long time.

The last few weeks I have been very active and I intend to be active in the future as well. No matter upgraded or not.

I have also helped and tried to help other users often. This includes helping them by replying on their threads, PM'ing them, helping them off-site etc.

I have never threatened, betrayed, harassed, flamed, blamed, insulted ,scammed or tried to scam a fellow member, nor will I ever do something similar in the future.

I always try to be nice and friendly with other members and to treat them with respect, although that's not always mutual.

Recently, I've posted a [tutorial](#) on how to download and use an application, which allows you to send snaps from your gallery and a lot more.

Why do I want this so badly?

I would really love it, to be a L33t member on HF. Especially due to its great features.

It would engage me to contribute to HF and help other members more often as well.

I thank you very much for hosting this contest, OP. Only a generous person with a good heart would.

I wish all of the best to you and all of HF!

Good luck to all the participants!

Like many the other participants, I'd really like to be upgraded to L33t.

Kindest regards,  
Rick Weber

[img]<http://x.hackforums.net/uploads/awards/gift.png>[/img]

Profile Link: <https://hackforums.net/member.php?action=profile&uid=2015410>

Contributions I have made to the forum:

I am always active, friendly, helpful and high quality. I have written heaps of tutorials on hacking and coding, including the biggest hacking tutorial on hackforums! My threads:

<https://hackforums.net/search.php?action=results&sid=99bd0bb71cf329ab9603b4e2b500c354>

I am really active in the coding section too, I help whoever i can with programming because i am very experienced - especially in Java.

I have only been on HF for less than a year, yet i already have over 2000 posts. Yesterday I had over 130 positive rep and no negative, but I got repfucked today for writing "Thanks is appreciated" at the bottom of one of my posts.

Welcome. I want to get L33T, because I do not have an appropriate amount to buy L33T. I would love to have it. An account on this site I started 02-12-2013. Time online I spent almost two weeks. I have more than 60 reputation points. and more than 400 posts. When I started my adventure with HackForums I made my free Booter and a lot of users were using it. Then I created a free skype resolver, which also enjoyed great popularity. Then I did the YouTube service. The last I assumed

the topic was about showing how to get free The Sims 2: P. Now I'd love L33T, but lack of money.  
In general, I try to help all users as soon as I can. In the future I will try to create some new services to help users HackForums. I would also like to give reputation to those who deserve it.  
LL?.  
If you would be so good and gave me the L33T, you were my god XD I will definitely get reputation points from me :D. That's it. I hope that the request will be considered positively :)  
Regards, Bless .  
PS Sorry for my bad English but I'm from US.

I know I am learning a lot from here, getting OMC and such, but one day I will become one of those people who returns the favor! Sooner or later I will be needing L33T and Ub3R to be a true HQ member so I will be striving to achieve that. Also, I do not have any money to spend anywhere so this is my golden chance of becoming an upgraded member. Many thanks! Also, this is a great favor you are doing for many people!

**Socrates????** - August 8, 2014, 7:36 pm

Sometimes it is very difficult for me to say "I deserve" this or "I deserve" that. But I have been on Hack Forums since February 24, 2014. In that time I have spent 1 week 5 days and 8 hours online. I have also made above 500 posts averaging 3+ posts every day. I always try my best to stay HQ and I also try very hard to not offend people. I have been made fun of for my avatar because people say it's childish but I'm actually 17 years old. I have tried contributing as much as I could to this forum. I have done, Bitcoin Giveaways, OMC giveaways ect. I did say L33t and Ub3r for all of my giveaways if you check my YouTube giveaway I had said I limited it but I never really did. Any member that posted there got what I was advertising. I even got accepted into an unofficial group called "The Givers" because of all the giveaways that I have done lol. I have also started 1 business on hf which was selling twitter followers. I made sure that all the followers would be delivered in a timely manner (24 hours) and it was the cheapest on hf (0.40\$/k). I no longer do this service since limitations on my PayPal. I once even started an ewhore stream (I hate doing it) where I taught every member who joined how to ewhore on kik. I showed them how to get 150+ adds on kik in about 30 minutes. I always try my best to go above and beyond when doing anything on this forum. From here I hope to be more active in the .NET section posting some random free source code and maybe some tutorials if there is an interest in what I'm doing. I hope I'm never considered low quality or any of that. In summary I think I deserve l33t because I always try to be very HQ, I have done a lot of giveaways, I have taught members how to ewhore, and I'm generally a nice guy. Plus I don't think my reputation is that bad but I still am considered very new. Thank you for your consideration and good luck to everyone!

**Rathz** - August 8, 2014, 7:38 pm

Damn, you're definitely a great guy, shame I can't write a app to get you to fund my clan. ?  
Joking, but I love what you're doing here, going to let a few friends know and hopefully you'll like their applications, just repped you hope to see you go far on HF.

**node.js** - August 8, 2014, 7:40 pm

Hey, I believe I should be upgraded to UB3R because I'm always helping whenever I can. If you take a look at my reputation, you can see a handful of people I have helped mostly in the Java section. Whenever I have free time I look to see if there is anyone I can help. I'm never rude and respect every member and their opinions. Being upgraded to UB3R would make me feel great for all the time I have put in helping out other HF members. I am also in the process of creating new type of tools for the community that will be very cheap if not free. I also have given out my skype to many users who message me whenever they have problems with their code and I help them for free. I promise their wouldn't be a mistake in upgrading me and I will be thankful forever.

**Rote** - August 8, 2014, 7:42 pm

Hi,

Most importantly I need to thank you for doing this exceptionally sort of you! I would love to get leet in view of mostly how extraordinary general this group is and the amount information I cherish offering to others. Getting leet would mean a ton to me, to impart my information significantly all the more in more and help other people. General the fabulous gimmicks it does give. My commitments range from giving tips on the parlor segment to giving exhortation on part's new site's and what they can do to enhance it. I have been on this discussion since 2011 and yes was much of a lucker yet I am ready to captivate all the more now and assist more individuals and perpetually helping into future giveaways. A side note I recognize such a variety of new clients giving incredible illumination who don't get thanked and may get judged by there rep so simply giving somebody +1 could demonstrate that there one remark implied something a ton to another person, and in a manner assuredly will make then return to keep on sharing their extraordinary learning. Much obliged to you again for this opportunity!

Hello (I'm approved for ub3r upgrade)

Before i start id just like to say thank you for this giveaway and Its an amazing contribution towards hack forums!

Why do I deserve this over everyone else?

-I have never been bad to the hack forums community and i won't in the future.

-Over the past month or so I've not been that active on hack forums so your probably thinking that I'm not the best person to choose, I was not on the forum for that month or so because i was at sleepover camp where i had very very bad internet connection, I tried my hardest to be as active as i can with very bad internet connection. Since I'm back I will be a lot more active if I'm upgraded or not.

-I think i deserve a ub3r upgrade because I've been on HF for along time.

-Whenever I'm on hack forums and through my life I always try to be nice and friendly with other members/people

-I Did some free stuff for the community as i gave people free youtube views, clicked peoples links, gave people free twitter followers, giving out a method to get free BTC.

Why do I want to be ub3r?

I would really want ub3r so i can use its features to the fullest. if someone deserves a positive or negative rep now i can make it stand out more by making it +2 or +3 and then -2 or -3 unlike l33t with +1 or -1. it will also make me want to contribute to HF a lot more and help other members more too.

Side Notes...

thank you for hosting this contest. good luck to everyone trying to enter. i wish there were more users as nice as you!

Thank you for taking you time for reading this -Kogut

I have contributed numerous high quality completely custom coded tools to this forum all for free.

I have been a long term member and always done free stuff for the community so I could never

afford to upgrade myself to l33t.

I have coded some of the most used software in the world including the worlds #1 most used API creator.

If I were to receive an upgrade, I would love to custom code you software and give you beta access to all releases, thanks

Hello LL?... My name is Proxy and my wish is to be upgraded to Ub3r (I am already approved). I started on this site quite some time ago. I was in the SST scene a lot and for a time had the most powerful stress testing service around. I was vouched for by Orgy and several others back then. I was mentored by Srblche back in the day for pentesting and the like. I'd had my ups and downs on this site and recently I've been trying to get back into it and be the most helpful user that I can possibly be. I've done several giveaways and helped the community with any exploit that I've been able to find. I had a bad reputation for a little while and I'm seeking to make amends with any people I've ever wronged as well as help new members and make this site a better place altogether. I think getting Ub3r would definitely help me turn some things around and definitely give me the motivational leap I need to remain active on this site. Below I'll link a few of my giveaways:

[Proxy's OMC Recycling Thread](#)

[Badass Free Stuff Thread #1](#)

[Badass Free Stuff Thread #2](#)

[Destiny Beta Code Method](#)

The badass free stuff thread I had a lot of fun doing. I'm not an artist but I ended up fulfilling many art requests and making a lot of great friends in the process. I'm not sure what else to say but thank you. Thank you for reading this and thank you for considering me as well as helping out the community. You're a fantastic user and I wish there were a million more like you.

It is with great enthusiasm and pleasure that I submit my application for A L33t position. As a member on here with great experience, I know my diverse skills and qualifications will make me an asset to Hackforums.

Now I understand you're looking for member's whom have contributed, now I haven't done a actual giveaway.

But, the knowledge I've dropped is more then anybody could give.

For example just the other day I gave the best advice anybody could ever give to somebody who was asking how to buy weed for the first time. Now that's a giveaway.

"I drop knowledge so heavy it leaves the world unbalanced"

Not going to sit here and lie, if you upgrade me you won't regret it.

**King Bob** - August 8, 2014, 8:35 pm

Nice giveaway, man! I would apply, but I haven't given much back to the community and some of these guys deserve it more.

gl to everyone!

Sorry that my post doesn't have colors or a unique design, it's hard to type on mobile with my big fingers. :P

Hello, first off I would like to thank LLA for holding this amazing giveaway.

Now, starting my application I would like to address the point that if I am one of the several lucky winners, that would help me out tremendously as my laptop is currently broken so I use HF on mobile, and I have been for the past month or so. Getting upgraded would give me some relief and save me money so I can get it repaired.

I was on HF about a year before I made this account (not a multi, my account pruned) I was mostly lurking the site because I didn't have anything worth saying in most threads. I've learned a lot in the past five months of being on HF. I know I'm not the most active member, but I still try to give back to the community, whether it be giving advice in the Innuendo section or talking with someone and putting a smile on their face. In my opinion, that's a lot more powerful than \$0.10 giveaways for upgraded members.

I wouldn't like to put myself on a pedestal saying I deserve an upgrade more than another member because I don't know the situation that someone else is in. But, having said that I try to be as HQ as I can when posting.

I have a few giveaways planned for the future once things get straightened out for my family and I.

Once again, I would like to thank LL?. for giving me the opportunity to have my account upgraded a second time.

Congrats on the ub3r upgrade. Best of luck to your PC repair.

3 upgrades done today!

**t0rch** - August 8, 2014, 8:50 pm

Hello LLA,

Personally I believe I'm fit for receiving the ub3r upgrade as I believe myself to be a valuable member to the community. I've done multiple giveaways and I'm even doing a large OMC lottery right now. Which by the beginning of september it'll be at least 6000 + OMC that I've given away to the community. The money for the current lottery came directly out of money I've made online. I've

also written quite a few tutorials on both Python as well as SQL injection and I intend to make several more on a few different topics. I offer my services to anyone looking to learn Python or PHP and I'm active daily. Although it says my posts are only 2.4 (ish) per day I've raised that from 0.66 in two months. I was inactive for two years and only recently have decided to start contributing a lot (You can see when my rep started increasing).

Currently I've applied for ub3r and am fairly certain I'll be accepted so if you're interested in choosing me to upgrade I will let you know as soon as I get accepted. I love this community and plan to start giving back a lot more once I get a job later this year.

Thank you,

BinKill-Ethical ?

I have been approved for Uber.

I regularly help out in the crypto section, and help anyone and everyone who posts in there. I don't care if you have 1 post, 2000 posts, or 2k rep; I help everyone the same. If you have a question about implementing a cryptographic algorithm I can almost always help out, and I also steer people in the right direction when they are totally lost. I have also helped fix a couple of member's HDDs(<https://hackforums.net/showthread.php?tid=4231667>) after the encryption algo/program did not work correctly.

I have a lot of good posts in that section, but this one I think is my favorite out of all of them. It describes why you can't just randomly post inputs and outputs and ask whether or not we can break the algo: <https://hackforums.net/showthread.php?tid=4191073&pid=39854956#pid39854956>

This one was in discussing how to improve an encryption scheme, OP and I carried on the convo to pms after a little bit

**Vip?r** - August 8, 2014, 9:24 pm

My entry:

My name is Viper and I joined HF for almost 5 months now.

At first I was not sure were to start, I originally joined because I needed help creating a program in vb.

Many people were kind enough to help me. I eventually started looking in a bunch of different sections, mainly in the hacking area.

I learned many things that fascinated me such as ratting.

Then I started creating free graphics and doing what I could.

I started visiting the AA (anime adventures) section frequently where many of the users were kind and welcomed me with open arms.

I started visiting HF more and posted more.

I'd like to be upgraded to +rep people who I believe deserve it and to be more trusted.

I tried creating a sales thread but the results came out horribly since no one knew me.

I plan on expanding and becoming more of a trusted member.

I'd like to start sharing what I have learned to others one day and hopefully be able to do a giveaway to give back to the community that has taught me so much.

This might not sound like the greatest application but it's all I got.

**Zanwald** - August 8, 2014, 9:24 pm

**Elixirz** - August 8, 2014, 9:35 pm

Hey, I'm Elixirz! :) Well here it goes. First I will talk a little bit about my computing. Well let's see, I started getting into computers when I was 6. My mom had an old windows 2000 computer, and used to play the old games like pac man, dig dug, and frogger. So one day I started playing. I had no idea what I was doing and she had to guide me through getting to the game and such. A few weeks passed and I had it down. Then one day I realized these small icons at the bottom right corner of the desktop and started clicking them. I thought it was like something never discovered and would tell my mom what I did. Often getting "don't touch that you are going to break something". I never listened and one day I corrupted the sound driver. I was scared, so I messed with everything, furthermore crashing the computer. After we got a new pc, I started to mess with stuff again, and got good results. I think that is how I got into computers. Further down the road I started teaching myself new things just to get a good result. I am the type of person that loves learning stuff by myself. So a few months ago I really started getting into the Hack forums community and it has been truly amazing. Either the really good tutorials I take from and change up to something unique, or helping the new members. Whatever am I doing feels nice. I have been studying php from the forums and have started on a project I hope to sell down the road. A l33t upgrade will help with a lot of things. First off I want to boost new peoples confidence with a positive rep. I want people to feel motivated so they can achieve something great. L33t also will get me one step closer to achieving ub3r, and that will save me money because money is hard now a days, and I have several felonies, and jobs are hard to get with them. To wrap things up, the final reason is the feeling of accomplishment. L33t is a huge step forward into this community and would mean the world to me. Thank you so much for this giveaway, it is extremely generous, and will help a lot of members. Best of luck to everyone! Sorry if there is typos, I am on a Kindle, and it somewhat difficult to type :p

**Dragon.** - August 8, 2014, 9:53 pm

I figured I might as well apply for this.

Jeez. Time really flies, doesn't it? It is as if I just joined HF yesterday. Thanks to all the countless members who have made my stay here an enjoyable one (especially those in the AA section. You guys are the best).

I love HF. I love the people, members, and posts that I run into every day. I can live without being upgraded; however, I feel that by doing so, I am limiting what I am able to do on site. One of these is being able to post in the SRPP section. As much as I would love to post here and join in on the thought-provoking conversations, my rank says otherwise.

As much as I'd love to upgrade on my own, I can't. I'm currently short on funds, because most of it is being placed into the maintenance of my site in my sig (which was originally made for the members of the AA section here on HF).

I don't know if this counts much, but my contributions are mostly to HF's AA subforum:

<https://hackforums.net/showthread.php?tid=4003150>

<https://hackforums.net/showthread.php?tid=4164584>

<https://hackforums.net/showthread.php?tid=4206955>

<https://hackforums.net/showthread.php?tid=4025959>

<https://hackforums.net/showthread.php?tid=4282351>

<https://hackforums.net/showthread.php?tid=4016918>

The exception is my DNS server that I gave away to HF members back in December:

<https://hackforums.net/showthread.php?tid=3954931>

<https://hackforums.net/showthread.php?tid=3986841>

<https://hackforums.net/showthread.php?tid=3950205>

I hope my short response isn't an eyesore to look at. Thanks for doing this giveaway, and best of luck to all members who enter!

**Ryan123B** - August 8, 2014, 10:07 pm

First off I wanna start out with even if I do lose I still wanna thank you for this chance. So 2012 I made a account on HF and I wanted to be that hacker type guy but I never did it. I just did RATs and Skid moves. I started posting in 2013 and more often in march 2014. I am now learning how to deface websites and security stuff with Vim (friend and his on here). I want to get involved in this forums more but I don't got the money right now. This is why I want L33t and I would appreciate it if I can win it in this contest. I try and help people the best I could on and off forums and I am actively on here posting. Thank you for reading my wonderful post.

**Sharjah** - August 8, 2014, 11:31 pm

**Zadnik** - August 9, 2014, 3:03 am

Hello, I'm Zadnik.

Im applying for...

Why should I get ?

Well I think I deserve L33T because I think I can help more people as L33T, many people ignore posts, make that alot of people, and most of the people ignore normal members, I can help more people by being L33T, because more people will notice my posts. I also believe I should be L33T

because I have helped people with Xbox Live Gold, and I cannot edit my posts over 1440 minutes, therefor no longer being able to update the public daily code for everyone, winners, etc.

What have I done, and why should I deserve .  
Here are some things I have done for the community.  
[Free 48 Hour Xbox Live Gold Giveaway Everyday](#)

[How to jailbreak your iDevice](#)

[Free Facebook Accounts](#)

I plan to do many more things for the community as L33T.

I think I deserve L33T because I really do want to help people with there problems with hacking, gaming, etc. I think I deserve L33T as I think I can go much further as a member with L33T, the possibilities as L33T are huge, thats why I think I deserve it, to give more to the community!

Extra

I would personally like to thank LLA for hosting this thread, and giving the lucky people L33T or Ub3r.

Kind Regards,  
Zadnik

**Callmehellor** - August 9, 2014, 3:14 am

I really have nothing that I have contributed yet, although I can guarantee you that I certainly will after a while. In the computing world, one of the things I value most is to gain respect from the hacking community. I will build a reputation for myself, and do my best not to offend anyone. Trust me, if I had money to spend then I would have bought the upgrades already. The only thing holding me back is the fact that I do not get any money to spend anywhere, which means that it might be a very, very long time before I get a chance like this again. When I do learn and gain enough knowledge, I will start teaching people who are new to the community, and gradually graduate to writing open-source software and such. I am confident that I will become one of those few that really stand out, and maintain that reputation. I wish I had more knowledge in computing so that I had the chance to distribute my work, but I am not up to that level yet.

I believe that I deserve the upgrade because I would put it to good use and be more attracted to HackForums. Regardless of whether I get the upgrade or not, you are a goddamn nice person. Not many people would do this for the good of others.

My name is KyoZ. I am not going to brag "I'm HQ Pick me"

I'd Like to Win the UB3R Upgrade because i've Been enjoying Hackforums Alot.  
And therefore if someone does a good job at either helping me or someone else,  
I Can give them Some reputation points.

I can give them with L33T Also. But +3 Is a little bit more ^-^ Obviously.  
I've Been enjoying this forum since the day I've Signed up.  
Helping people in either "hacking" Or Personal life In lounge.

Hackforums is also a great forum to make friends.

I've made a thread about that. And made lots of new friends.

This Upgrade Would Fit perfect in my account.

Over time I will contribute and gain respect, I can do that with L33T, But UB3R Helps me get there faster.

With UB3R, I Gain extra privileges and Can learn Alot in the new sections.

These will help me improve my skills.

And Maybe One day...I will be a moderator.

But for now on This upgrade would fit perfect in my account.

I hope to hear from you,

Kind regards,

KyoZ

**Divined** - August 9, 2014, 1:15 pm

Hello there man! First of all thanks for making this wonderful give-away and helping people. It's really appreciated by everyone I believe who's not able to afford an upgrade for their own account. I'd like to be picked to be upgraded to l33t due to the fact that I've been here for quite some time and L33T would be a great addition for myself being a part of those forums, I've been abused a lot by other people just for being a normal. In my honest opinion, people who are 'above' me, do not even listen to my own opinion just because I am normal. I want to actually be able to freely express my opinion and I want people to actually have a read through it, that would help my time on the forums a lot and I hope you agree to this too. Also, I would love to have l33t because I'm having some financial problems in real life at the moment and I can't really afford it, even though I'm trying to spend most of my spare time online, trying to earn some money to support my family after my father's death with the lawyer fees and all, failing to do so most of the time, so getting l33t would be a crazy thing for me right now. Also, I am taking part in this give-away because I have this feeling that I may get lucky and I am really hoping to do get lucky. Also, I know I may haven't contributed a lot but I also ahve done my fair share of work around these parts, helping several people via pm's, here's some of my contributions:

<https://hackforums.net/showthread.php?tid=4318009>

<https://hackforums.net/showthread.php?tid=4326145>

<https://hackforums.net/showthread.php?tid=4329750>

There you go, that is all for now, really. I do hope that this feeling I'm having is not just another feeling messing with my head. Once again, thanks for this giveaway! My best regards, Jim.

Hi LL?., this is my application for the L33T upgrade.

Profile Link:

[-Sinister-](#)

[UID: 2214473](#)

Why do I deserve L33T?:

I personally think I deserve this L33T upgrade because I've tried my best here to help out as many people as I can on HackForums. Whether it's dealing with a small problem that can easily be resolved, or answering questions members may have, I do my best always to help out whenever I can. By receiving this upgrade, I would be more "known" and feel more "trusted". To tell you the truth, many people have a hard time trusting non-upgraded members than they do with upgraded members, and I really hate that feeling, but I really can't blame them for that. With this upgrade, I plan on contributing a lot more just like you are currently doing! Helping out more often, and trying my best to give back as much as I can to the community is my priority. I also would like to receive the benefits of a L33T member. Extra PM space is nice and access to the L33T section of the forum would also be a nice luxury. I'm currently a HQ member of the forum, but not many people realize that because of my non-upgrade status. Receiving this upgrade would show others that I'm actually a HQ member.

What contributions have you made to the forum?:

Like I have stated above, I do my best by trying to help people here and there with any problem they have. Whether it deals with relationship problems, certain advice/opinions, Minecraft server problems, all sorts. I tend to go on my way to support others who DO need help. I may fail here and there because the lack of knowledge I have to a certain member's problem. But whenever I know the answer to a problem that I've either experienced or known, I do my best to help out. So far, I've done a Multi-Giveaway thread ([which can be found here](#)) and made a tutorial ([which can be found here](#)). Of course, I'll be contributing a lot more back to HF whenever I can.

Extra things I want to say:

I would like to say thank you LL?. for hosting this contest. You've just gave me another opportunity for me to become an upgraded member of the community. I'll be sure to use this upgrade to benefit the community. I'm applying for this upgrade contest because the last "upgrade contest" I won was actually fake ([more information can be found here](#)). Again, thank you for this opportunity and good luck to all those who have posted their applications.

Hello , my name is who , my name is what? Janko.

So , I am old member here , since 2012 I think . But my account got deleted because I couldnt access HF from my country :) So I made this account like month ago and started making discussions about certain themes. I started making friends on hf really fast , and till today I spent 3 days on HF . Why should I get this award? Well , there are several reasons . First of all in my country I cant make paypal or any other payment account ( I would buy l33t or something if I had one honestly ) , which means I can't buy anything on internet , its even worse because im not yet 18 :( Second reason is that I have knowledge , now you may ask me what knowledge has to do with this . Honestly my opinion is that Ub3r or l33t should have at least Medium knowledge about certain themes like Exploiting , Programming , Graphics , Internet Marketing , Smartphones and stuff. I've seen lot of guys here just screwing around doing nothing for community and still trying to RAT you or something. I mean , there are good guys also , I met Gizmo who helped one time , we were talking on TV for like 2 hours or something and it was great , I was happy to meet one of Ub3r Users. My contributions? Well , there are little of them , since I am here from last month . That's pretty much it , Im hoping to get lucky :)

Applying for L33T

Contributions to the forum:

<https://hackforums.net/showthread.php?tid=4376460>

-RGH/JTAG help in the jtag section

-Help people get their 50's on halo 3 for free on HF.

-Give people free exp on halo 3 on HF

-I will soon be hosting free lobbies on MW2 and MW3 for HF

- I will soon start hosting black ops 1 and black ops 2 modded zombies lobbies for free for upgraded members because they are super fun to play in.

Why I should be L33T

I think I should be L33T because I do many services (free and paid) which help a lot of people out. When I am L33T it will also help with my shop so I can edit the thread whenever I can to notify people if I am available or not available to do recovery's. I also would love to be able reward people with rep when they are helpful to me or other members. I also want to be able to leave rep on scammers to stop them from scamming other members. Hack forums has taught me and helped me in many ways. I have gained a lot of knowledge in jtags/rgh's. I also learned many things about rats and keyloggers. I would like to give back to hackforums and get L33T but I do not have much money. My recovery service isn't to make profit, but it is too help the community. All the money from my recovery service goes back to buying kvs to do more recovery's. I will be using this upgrade to help me and the community. Thanks for reading my application and I hope you accept me.?

I would also like to say thank you for hosting this giveaway. I have seen many contests for being upgraded and some of them have been fake. Your one legit guy and I would like to say thank you again. Good luck to all who posted applications and I hope you guys get accepted too.

VOUCH for this user. He really deserves the upgrade.

**Vampirion** - August 9, 2014, 3:27 pm

Alright, first of all. Thank you so much for doing this giveaway. Even if I don't get anything out of this. It shows how much you support the community and the people in it.

Anyway, I am not really known here because I wasn't that active for a while.  
Even though I really love the forum and been here since 2012, alot of lurking I got to admit.  
I try to help users wherever I can my specialty in this case is Marketing that's why I haven't helped many people yet.  
I don't know much about hacking nor about programming, I know the basics and that's about it.

Whenever someone PM's me I always give them an honest answer about any questions they have.

The main reason I am on this forum is because I love the discussions, the news and happenings section for example is better than my local news station heh!

I am also interested in hackers and how they work so it's lovely to see people discussing topics like that.

Why I deserve L33T --

I have been on this forum for a while now and never gotten the chance to upgrade. I never had the money. And when I had the money, I wasn't dedicated enough to HF to actually spend money for L33T.

I believe many users would probably deserve L33T more than me, I haven't done giveaways and such on here.

Although I will do that in the future.

I have bought stuff on the marketplace though! Which was mostly HQ and that's something that made me wanna stay on HF aswell :)

Whenever you see me helping people it will probably be somewhere around the money section!

I would love to receive L33T but I would not be mad if I don't get it.

It's your choice and feel free to skip me if you don't think I deserve it, I just grabbed this chance to finally get L33T

Thanks for reading, sorry for the many white spaces I like using enter.

Applying for UB3R.

First of all, thanks for doing this. No matter if I win or not thanks for giving back to the community, I'm sure that you're making a bunch of people happy and satisfied with this. On this forum I just try to help people out and give them some of my knowledge. I've always helped people for free on this forum.

These are some examples of recent things I did for the community:

- <https://hackforums.net/showthread.php?tid=4287310>
- <https://hackforums.net/showthread.php?tid=4376807>
- <https://hackforums.net/showthread.php?tid=4240753>

I also think I'm getting more HQ every post I'm making. I like the features of UB3R, but simply don't have the spare money for it.

Its also holidays for me, which means that I'm going to be a lot more active.

Thanks for your time,

Kogut's Second Upgrade Request

I've been approved for ub3r

L33t ----> Ub3r

What makes you thing i deserve Ub3r?

Well, i have been as active as i can over the past months and i always try to be HQ. I always try to help other members out, i always try to teach people what i can and, whenever i can. i love to give back to this huge community. To tell the truth, i really like this forum, and i just can't spend a day without visiting it. Besides all of this, whenever i can, i try to be the most responsive and helpfull person that i can, since i know that to fight the LQ , one must be HQ+.

What have you done for the community?

Ever since i started being more active, i started to do more and more things for the hack forum community. i have a thread that tells members how to get free btc a very easy way to ge btc. you can check that thread out here; <https://hackforums.net/showthread.php?tid=4385652> . i also have gave the community free youtube views you can check that out here; <https://hackforums.net/showthread.php?tid=4296983> and <https://hackforums.net/showthread.php?tid=4014615> . i gave people free twitter followers you can check that out here; <https://hackforums.net/showthread.php?tid=4304211> .

I know its maybe few things, but i try my best to give back to this awesome community as much as i can. I try hard every day in order to help out people, but i can't giveaway money because atm i am

not able to do that. im always thinking of ways of giving back to the community, and i wont stop now , or ever.

Final Thoughts?

i would like to Thank You from the bottom of my heart for being HQ as you are, and i would like to wish all of the entries good luck, and if you win, please wear that colour with proud :)

Kind regards, from Kogut :)

(Aug 9, 2014 03:03 AM)Zadnik Wrote: [\[CITE\]](#) Hello, I'm Zadnik.

Im applying for...

Why should I get ?

Well I think I deserve L33T because I think I can help more people as L33T, many people ignore posts, make that alot of people, and most of the people ignore normal members, I can help more people by being L33T, because more people will notice my posts. I also believe I should be L33T because I have helped people with Xbox Live Gold, and I cannot edit my posts over 1440 minutes, therefor no longer being able to update the public daily code for everyone, winners, etc.

What have I done, and why should I deserve .

Here are some things I have done for the community.

[Free 48 Hour Xbox Live Gold Giveaway Everyday](#)

[How to jailbreak your iDevice](#)

[Free Facebook Accounts](#)

I plan to do many more things for the community as L33T.

I think I deserve L33T because I really do want to help people with there problems with hacking, gaming, etc. I think I deserve L33T as I think I can go much further as a member with L33T, the possibilities as L33T are huge, thats why I think I deserve it, to give more to the community!

Extra

I would personally like to thank LLA for hosting this thread, and giving the lucky people L33T or Ub3r.

Kind Regards,  
Zadnik

Just finished editing my post, hope you like it!

**cortz** - August 9, 2014, 9:49 pm

Hello,

We don't know each other unfortunately, however I hope you can get a brief understanding of who I am and what I do in this simple post.

I regularly lurk the graphic forums since I'm a design enthusiast myself. My goal is to potentially increase the quality of works that are presented here on hackforums. Far too many times have I seen new users trying to get into design but are met with useless generic feedback messages such as 'wow those are amazing' or 'these are terrible just uninstall photoshop'. I try my best to provide users with critical constructive feedback on their works to help them improve their own quality of design. I am a brutally honest person and many people will hate me because of it, however I believe honesty contributes more than sugar coating lies and that is why I am who I am. Other times I help those that are less tech savvy who have simple requests such as photoshopping images a certain way and I certainly do not mind helping out those in need with my ability.

At the time of this writing, my most notable achievement here on hackforums is to be able to create the userbar and graphics for L'appel du vide. I'm very honored to be able to do so and it always gives me a big smile to see that people enjoy it as much as I did.

I am interested in a leet upgrade because I feel it is a good step to be more involved into the hf ecosystem with many more features that I, as a regular user, currently don't have.

Why on earth do I deserve to be leet? Well that's not something I can answer. Einstein never called himself a genius, and it is everyone else that decided that fact for him. And because of that, I will leave that for you to decide if I deserve a leet upgrade or not.

Thanks for reading, have a nice day.

My UB3R Upgrade Application

[img]http://x.hackforums.net/images/modern\_bl/groupimages/english/ub3r.png[/img]

#### Profile Information

Username : BUSINess

UID : 2317606

Current Ranking : L33T

APPROVED FOR UB3R

#### Why I Deserve UB3R

And now for the application section of this post, i feel i deserve to be upgraded because i am actively on the forums as much as i can every day, when i post on HackForums i make sure it is at the highest quality

possible, so all of my posts are going to be as

meaningful, and high quality like this one. One thing

i have noticed between L33T and UB3R is the level of respect

and trust, most people hesitate to do deals with L33T's because they are "Less Trusted". Most of the threads i

decide to post are giveaways, like you saw above i try and give back to the community as much as i can by giving away free money. I also, had a VPN company when i first joined the forum that had a free package, and we had over 100 people using the free VPN every day, but unfortunately i couldn't afford to keep the VPN open any longer since it was free and was bringing no money in to pay for the servers etc. I of course plan to continue being on the forums actively, and posting more, i have some good tutorials planned and more giveaways planned for PayPal money, BTC and

OMC! I hope you consider me for a candidate for this contest, and again i really appreciate you hosting

this, it is very generous of you! Thank you to everyone that read my application as well.

### My Contributions

I have made numerous contributions to HackForums like i stated in my "Why i deserve UB3R" section, If you could please click [here](#) to see my first Omnicoin giveaway, i exchanged some of my paypal money for OMC just so i could give it away to the great members of HackForums, but after a while that thread got very congested. So i decided to host a second giveaway a few weeks later, click [here](#) to see my second Omnicoin giveaway. Another contribution i did was, i went on namecheap and looked up a ton of two letter domains, which are very rare. I got a list of about 30 of these domains that where not taken yet and posted them on the lounge. Click [here](#) to view that thread. Another contribution i made, i talked about in the "Why i deserve UB3R" section. I made a VPN company and gave away a package for free, and provided an amazing DDoS protected VPN to hundreds of people for about a month, until we couldn't pay for it anymore. And of course, i am going to continue contributing to the forum as much as i can even if i do not receive this upgrade.

### Closing Statement

I would just like to really thank LL?. for hosting this outstanding giveaway to help out so many people. I feel this is one of the first people i have seen on my time on HackForums that has upgraded so many members, and has helped so much by donating to the forum. I hope you take my application into consideration and i appreciate you taking the time to read it aswell.

**R I U** - August 10, 2014, 3:02 am

Its my pleasure that I submit my application for A L33t position . Over the past month or so I've not been that active on hack forums so your probably thinking that I'm not the best person to choose, I was not on the forum

But from today , i assure everyone i will be an active user helping hack forums and through my life I always try to be nice and friendly with our HF Family members

Getting a leet , will make little HQ and i can guide the regular members with the leet for any assistance , thanks for this oppurtunity

<https://hackforums.net/showthread.php?tid=4373085>

if you give me l33t really i am happy.

thanks friend,

**Combatant** - August 10, 2014, 11:15 am

Hello, LLA. First off, thank you for giving myself and many others the chance to be able to apply to possibly get a free upgrade. That is very kind of you, and not something you see on the forum too often.

First off, I'd like to say I believe I deserve this upgrade on the grounds of the rules I live by; Be moral. Be mature. Be nice.

Each of these go a long way to make sure you are presenting yourself to others in a kind, respectable manner and ultimately ends up in your favor because you come off as a nice and helpful person, in which I always strive to be. Being moral includes the basics; don't steal, don't lie unless it's truly needed, etc. all of which I always, always do. Being mature includes really what it seems like, for example; If someone gets in an argument on here and disagrees with you or anything, don't flame them or harass them. Not only is it against the rules, but it is just the mature thing to do, again, which I always try to do. The next one is be nice. Being nice truly does go a long way and makes people feel good about interacting with you and hopefully means they'll be nice to you in return. However, just because someone is nice, that doesn't mean they're weak or that you should take advantage of them, which, unfortunately, many do.

With these three rules I follow, I always hope to spread my knowledge and regards in posts and offering to help. If someone asks me to help them or to do something (as long as it is not outrageous or illegal), then I always try my best to help that person out. As far as contributions go, I only have made a thread about how to change someone's IP and also use a VPN on Xbox or PS3 as I am always asked those questions. [Here is the tutorial.](#) I plan to do a lot more soon, such as giveaways and also make more tutorials on how to do things. I would be buying I33t myself, but you know, college tuition and having to help repay for your GF's car is not cheap these days.

I always try my best to be courteous, kind, mature, and thankful where it needs to be, whether that be on the forums or in my everyday life. So to that, I would once again like to thank you very much for the chance to be able to apply for an upgrade on these fine forums. I will try 110% to as always stick to my rules of being nice, mature, and being moral, as I want to leave a positive impact on these forums and share my knowledge of networking and cyber security, and even as much as going to helping out with personal, everyday problems too.

As another little thing, you have to be upgraded in order to post in the science and religion section. Those are big topics in which I like to talk about in a respectable manner, so that would be a nice little perk of me being able to receive this.

Thank you again for a third time, and I hope you have a good day or night, which ever it is for you. Also, good luck to all the other applicants who have posted on this thread.

If you have already been upgraded by LLA, I recommend you thank him as much as you can and be grateful for what he did, because again, kindness goes a long way and this is pure kindness that LLA is doing.

Kind reagrds,

Thanks for hosting this giveaway LLA!

I would like to be upgraded to l33t because, i plan on being a HQ user on Hackforums.

I love to see people who have made money on here, because after snooping about for a while i realised how hard it is to actually do that, nevermind think of what to do! Damn, that'd be hard.

I can guarantee that i will contribute to the forums, very soon, simply because it is such a rich, good and active forum.

Currently i havent got alot of money, but with the very small amount i have, i can purchase things on here that can help me start. I would love to be upgraded, if i was, i would try my best to get money, and pay you back. RESPECT!

Thanks mate, appreciate the chance to be upgraded! ?

Hello OP,

My name is Chris and I would like to be upgraded to L33T. I have been apart of this forum for around 4 years but I took about a year and a half off of it as I was focusing on school and life but before that I was always active so don't let my post per day fool you. I think I deserve L33T because I have contributed a lot to this forum. I have saved many users from being scammed(check my rep) and I've helped everyone that I can. I have done many deals on HF(eBooks and products) and never have had any scam reports/negative feedback by anyone on those deals.

If you pick me to be upgraded I would really appreciate it and be grateful. Continue to help everybody and continue being a high quality member on hack forums.

Thanks for taking your time on reading/reviewing my application and good luck to all the other people that are applying ?

**SIM-574702** - August 10, 2014, 6:05 pm

Hello ! I think you should upgrade me because I have spent a lot of time on HF helping new users by answering on thread or by responding to PMs. I have positive reputation proving I'm not low quality member or skid. I would buy leet for myself already because I can afford it but there is no way for me to get online money. I have to wait 2 more years until I can get my own credit card. I made couple of tutorials but my skills aren't enough to help community that much. When I get good in one specific area of computer science I will make tutorials for it but I still go to school so I can't dedicate enough time to get really good at anything important.

I hope I will win this because you don't care about formatting of application but about what it says. I applied to couple of contests but those with good design always win. Thanks for this contests wether I win or not, you helped a lot to community with this.

**LordSavage** - August 10, 2014, 6:16 pm

Hello, Thanks for giving this opportunity, alot of members tend to forget what it feels like to be a regular member and not have any way of upgrading. I joined back in 2012 and honestly I haven't used hackforums much until 2 months ago. I have become friends with many members of the forum and tend to help people out when I can but I'm constantly looked down on which limits me to what I can do or say in most cases. I moved to the united states a couple years back and am still trying to adapt to my surroundings. I try to learn as much as I can from the forums and show people who

know less while being courteous but I can't give much more because sooner or later any upgraded member could tarnish my credibility if he/she gets offended by any of my actions. So far it has gone well I even got moderator spot on the Instinct tinychat room where I frequent alongside with many high quality members. (tinychat.com/mhf). I was doing so good at getting along and helping out the members that joined that I got invited into instinct. I think I could make great use of this opportunity if given the chance I will attempt to give back as much as I can. Thank you once again (sorry for my bad english still adjusting to the language)

**Kobato** - August 10, 2014, 6:39 pm

First of all I want to thank LL?. for doing this. It show's how much he is dedicated to the forum and I think it's really awesome of him.

My application probably won't be that great but I'll still give it a try because:

"There's nothing to it, but to do it!"

Okay let's get to the fun part..

Kobato's UB3R Application

I am already approved for UB3R.

Who am I:

I'd rather keep my real name to myself but I'm 17 years old and from Germany (if my bad English ruins my application, then so be it. Atleast I tried :P ).

I'm on HF for quite a while now but I spent more than a year just lurking around and shifting from subforum to subforum.

I liked e-whoring and gave some tips here and there but because of personal stuff I stopped it aswell as took a break from HF.

After roughly half a year I came back and I really liked the League of Legends subforum (since I also love the game) and tried to post many HQ posts there.

Why do I deserve UB3R:

I wouldn't say that I deserve UB3R for many giveaways or stuff like that.

I think I'd deserve it because I'm friendly and I always try to be HQ and not blame anyone for mistakes.

I think that with my friendly and helpful attitude I contribute more to the community as I would with 0.10\$ Paypal Giveaways (nothing against those guys who do those giveaways, you are great!).

As I said earlier, I try to be helpful in the League of Legends subforum but I also sometimes check the e-whoring subforum and see what new kind of stuff there is or if a newbie e-whore needs help which I can provide.

I also sometimes (more like seldom) check by the Graphic Requests forum to see if there are any unanswered requests. If they are there and I think that whatever the OP want's is possible to do with my poor Photoshop "Skills" (if you can call it that), then I'll give it a try.

Anyways here are two small tutorials I've made a while ago:

<https://hackforums.net/showthread.php?tid=3522634>

<https://hackforums.net/showthread.php?tid=3372074>

Not much but as I said, I mainly contribute by giving tips regarding e-whoring or League of Legends

Conclusion:I'm not the most contributing member

I don't deserve it "more than anyone else" but I think I'd deserve it to some point

I always try to be friendly and HQ

I really appreciate what you are doing for the community

I suck at applications

Edit: Wow I didn't think that I'd make it. Thank you so much OP!

**GamerBoy1499** - August 11, 2014, 4:24 am

First of all, thanks a lot for hosting this amazing giveaway and shelling out so much money, that's through BTC. I really appreciate it.

First, a little about me, I came to know about hackforums in May when I was learning some GFX on youtube, I saw a video saying "How to be a hacker" and when I saw it, it was actually "pretending" to be a hacker" which I really don't like. Then I started researching on which is the best Hacking forum because forums are much better than websites, which may or may not update content regularly, but in a forum, you can interact with like minded people and learning will become much more interesting and at the same time, you can earn some money to spend it around or save it. I saw many forums but I decided on Hackforums because of the amount of tutorials on hacking, which was massive. I signed up and then slowly I started seeing tutorials and stuff. Then, I just went to the buyers bay section and saw a guy (username:"Michaud") wanting to buy article writers. As I am very fluent in English and had spare time, I skyped him and then, my first deal on HF was sealed, I got my L33T in exchange for articles. Also, I have a lot of interest in technology, so I made articles and swapped it for a L33T. The deal was done and I got my L33T upgrade. I was very satisfied because, unlike other forums, HF will never go dead. Like, many forums come up and they are highly active at one point of time and all of a sudden, they go dead. This is mainly because owners want to make money and they don't care about the forums. But I knew that Hackforums was not like that and I knew that this L33T will help me in the long way.

After this I started seeing many GFX tuts of HF and got resources for the resources section, practised some GFX and I still am but I have issues with my photoshop so I halted it for a while. I recently got a massive GFX pack which is almost 4-5 GB in size when zipped and is helping me a lot in GFX. I had seen many ebooks and stuff promising you money but I never bought one. I wanted to make money though. Also, I mined lots of OMC when it was at \$0.01 per Omc but now I'm at a huge loss, still have some OMC sitting in my wallet. I started trading crypto currencies and so far it has been highly profitable, I traded LAt, with a decent profit considering that I put in very less money. And now I'm planning to start an exchange( some special ideas into it) but sadly I cannot do so until I am an UB3R. I applied for UB3R on 13 July and I saw so many applications were there in queue so I thought this is going to take a long time. A couple of days back, I saw your thread and also made a post wishing everyone participating Good luck as I didn't get the Approval PM, and ironically I got the PM today, and I was on cloud 9

Now I can make my exchange and have access to all forum sections and also, due to my heavy loss in OMC I'm unable to pay the price myself, or until I make some money. But the point here is that I'm not selling my omnicoin because I'm collecting it and hoping the price goes up because if I sell it now I'll be at a huge loss, instead of being at a loss, I'll at least contribute to the community some way, maybe upgrade people to epic or just wait for the price to go up. Speaking about contributions, I've not many giveaways except one in which I have given out \$0.21 PayPal, but PayPal wasn't allowing to send money, so I gave \$0.14 PayPal and around 30 cents BTC.

So, one thing is clear I have made very less giveaways and I have to make more.

Why I want to become UB3R?

Because I can start my crypto currency exchange, get access to more member forums and also, added goodies like giveaways, which give UB3R's most priority and also, I'd love to be an UB3R for contributing to the community. Put into one word it'll be amazing.

Also, I have around \$3 BTC in my coin-swap account and that's pretty much it. It is going towards my collection for the UB3R upgrade. And if I win this upgrade from you, I'll most probably give it away.

Basically what I wanna say is that I was a member of a few forums a year back but they were boring, but Hackforums is a class apart. Always active and much nicer place, both to learn and

contribute because you can learn from pros and contribute because it helps and also, it's a great community, you that feeling automatically. I've tried to stop breaking of some rules like giving away Serial keys, codes and non-free accounts and stuff. This is because of the wonderful community, it automatically comes into me that I should stop rule breaking or help in whichever way I can.

Overall, I want to thank you very much for giving this opportunity and hosting this giveaway, and also, I just didn't write these 900 words (checked in MS word ? ) to win, I wrote the truth, what I feel and what I will do, because I'm having lots of interest in crypto currencies, the only thing that's stopping me from investing more is that I'm just a 14 year old and I can't get irl money into BTC (I live in India) If I could, I would've investing loads of money into stuff and done many things. Once again, thanks a ton for hosting this giveaway, really appreciate it and I wish you, the forum and all the members success

**FarewellMyPuppets** - August 11, 2014, 4:34 am

About me:

- I'd like to stay anonymous about my name and location, but I'm 23 years old. From the moment I joined on this forum I knew that only thing I want to do is giveaways. I've been on other forums, but I feel like this one deserves most contributions because of nice and friendly people. From time to time I also do graphic services for people and I never had a single unsatisfied customer. The most precious thing on this forum is to stay HQ all the time. Don't try to insult someone just because he/she didn't know something you did. Instead, try to help them, try to answer their questions. I've been told that there is NO stupid question, only stupid answer. Trust me, I'm nothing special, I'm just a regular guy like you who likes to make people happy, either in big or small ways. I never lie about myself, I never make myself look rich or better than others. I respect other's opinions, either it's about gay people, LQ people etc. I judge no one. Someone says that a user is a skid; maybe he's just trying to be funny? Someone says a user is an idiot; maybe he didn't mean anything bad? I've seen a lot of judgments on this forum, but I will say this: Don't judge anyone, because you don't have a clue about his life. I could write more, but I don't want to make this too long! :)  
Why do I deserve L33T?

- As I said, I won't try to make myself look better than I am. I have no intention to lie about myself to get L33T. Everything I will say in next couple sentences is true. I'm a new user, I know it, but all I want to do on this forum is contributing, making users happy, give them something for free (because EVERYONE loves free stuff ?). For now, I had 2 giveaways and they can be found here:

- [Giveaway #1](#)

- [Giveaway #2](#)

Those are my giveaways and I will surely make more giveaways in the near future. But, let's get back to a question why exactly I want L33T. Well, L33T gives you an option to use images in your signature. I planned to advertise products for free, YES, for free. If I ever become L33T, you can contact me for free advertising :). Also, I will be able to participate in many other giveaways provided only for L33T/UB3R members. I think this is all I can say for now! Also, one more thing, I will do my best to stay HQ and friendly and to contribute to this forum as much as possible like you do! I really appreciate what you're doing for people, I think that's amazing :)

**?Dødøsky** - August 11, 2014, 4:39 am

I have already been approved for UB3R

I think I deserve the UB3R upgrade because 1st I wouldn't be approved for the UB3R upgrade, I'm one of the few edm producers in the forum with flashpoint and edm lover... I would like the upgrade because I can be more trusted if I am and I can't post in other sections like the booter selling section and so on

Encoded' - August 11, 2014, 5:24 am

Thanks a lot for hosting this fantastic contest. I have just been approved for ub3r and I would love to be a ub3r member.

I deserve ub3r because in this forum I'm always trying to be HQ as possible and If I win ub3r, I am sure I will do more for this community as a thanks for ub3r.

I love this community and I wish to stay here for a long time. I want to get trusted and also have many friends. I don't think I will win ub3r, because I'm mostly unlucky in the member contests category, but I will just give it a go. I registered this account in 2013 and so far I got nearly 600 posts and +43 reputation.

I wish all of you good luck with this contest and a great day.

Greetings from Equilia ?

I'm trying to find my way in the Graphics' Section as of now,

I edit photos,manipulations,Siggys etc

I have many new ideas in my mind,that I wish to introduce to HF!

& my main priority is to be HQ Member in this community :)

Hope I can achieve each of my milestones with an L33t Upgrade.

Adding to that,I really dont have the money to upgrade.

I'm sure that I can contribute BIG to this forum in the near future!! ?

Its been tons of upgrade contests I've been posting on....

My application:

About me:

I am Collateral and I live in one little town in Serbia. I am 19 years old and I am on college. I am studying coding( HTML, PHP, JQuery, C++). I am doing a great job and giving it a lot of effort.

HF story:

I think is sould be Uber because I have been so long on this forum and I always tried to contribute and be HQ and all in all be one of the good buys, never really had money to spare for this. I joined HF as a skid ( Trying to HAX my friends facebook) but in some time I fell in love with HF and started learning new things. Thanks if you upgrade me , if you dont them no problem at least you are contributing to the comunity and that is great. I am also doing few project here on HF that are working so great. In this moment I am learning HTML & CSS,Jquery and JavaScript. I have been making sites on my own and I think I am really learning fast. I have never applied for Uber till 2 days ago. Now I am accepted, I never wanted to apply for it because I thought that I didn't want to be one

of those LQ Ubers(Now days almost anyone can get accepted but I didn't want to be anyone). I am not doing any fancy thread design because I am working on my Custom theme for my gaming forum(When I finish it I will show it to you).

I am here from 2012 and have been active for time of few weeks.

I contributed to this community already

<https://hackforums.net/showthread.php?tid=4293932>  
<https://hackforums.net/showthread.php?tid=4327533>  
<https://hackforums.net/showthread.php?tid=3910801>

and so on.

I like to help people who are infected via RAT or viruses..  
I helped almost 8-9 people by cleaning thier system.

I loved this to do.

If I get ub3r it will encourage me and I may enter in the white hat section to help more.

I am now developing some Android Stuffs those will be posted soon on the forum.

The main reason : Here I heard by alot guys that HF is full of stupid kid ub3rs. If I will be ub3r I can help to improve the reputation of ub3rs bcoz most of the ub3rs here are rude and they just neg others for no reason I saw many posts and heard in many groups.  
So I just want to change that mentality.

huh?

I hope I will get ub3r since I am already approved for ub3r.

Thank you.

**Wired?** - August 11, 2014, 11:15 am

Thanks for hosting this contest. I have been wanting to purchase UB3R for a while since I got accepted and haven't had the funds to do so. A few reasons why I believe that I deserve it are that I am active, I help users, and I contribute to the forum.

I joined in mid 2013, and I wasn't really active back then. In the past few months, I've been more active than I ever have. I've raised my post count from a little under 200 to over 500 in just under a few months. I try for all of my posts to be high quality and full of helpful information. I try to check the forum at least once a day, and post at lead one thing a day.

In my time here so far, I have helped many users. I am mainly active in the Webmasters section, answering any questions that I know to the best of my knowledge. But, I don't just limit myself to that

section. Whenever I learn something new, I try to help users with questions on topics that I have learned to the best of my ability.

Contributing to the forum is a big part of being a HQ user in my opinion. While I haven't made any megathreads, I've hosted some giveaways for paypal money, helped out many users like stated earlier, and my most recent contribution was a [L33T upgrade](#).

Thank you for reading my entry. I wish the best of luck to all of the other entrants.

**zirene** - August 11, 2014, 11:21 am

I would like to be upgraded to leet for many reasons.

First off, thank you for hosting a giveaway like this.

I want to be leet so I will be more respected among the other members, I have been lurking around and I have seen a lot of upgraded members not give the respect non-upgraded members should have. The non-upgraded members are treated like dirt under their shoes. I also want to be leet so I can be seen as a more helpful member and post tutorials around the vip section of this forum. And I hope to be very active on this forum because the graphics section intrigues me very much.

I have contributed in the RMG section and I hope to keep doing so.

**topastop** - August 11, 2014, 11:26 am

Hello LL?..!

I think that I deserve to be upgraded because I have been a HQ member to the community. Why I say this you are asking? Well, besides making a huge thread with a guide to clean your PC from viruses and besides making HQ posts I also made OMC giveaways and organized a contest with [Ray](#).

I wish to be upgraded because I can gain access to the VIP area, have a larger PM size, organize contests by myself, become more trusted and, most importantly, be more involved with the community.

The ability and responsibility to give rep to members is also important because I can use it as a way to encourage positive behaviors around the forum and discourage negative behaviors as well.

Please understand this: By upgrading me, you are not simply just upgrading a member. You are investing in me and by investing in me you are investing in the hole community due to my quality posts and giveaways. Becoming a L33t is not simply a reward, is a very big incentive to me to keep going and become even more HQ.

I don't think I'm much deserved to be upgraded over other guys, still I believe I've my own points, I came to this forum to study GFX and graphics,

it's my passion and dream, I helped many users as you can see from above examples, I never charged a single penny from them because

I never wanted to make money but to improve my skills and help others. I feel I deserve to be upgraded because

I can help members even more as a upgraded member, this 50 PM thing is killing me,

I get many PMs everyday from members to make custom GFX for them.

It'll be great if you could help me to get upgraded.

I'll be eternally in your debt if you could do that

My reputation is because of my grieving team, that we eventually relised that it was a dumb team, so we turned into a coding/art team.

All the other -rep are just because people think I am buying vouches, etc etc when im not.

Hello, First off, I want to thank you for this contest.

The reason why i should get ub3r.

I been contributing tons of tuts to the High quality hf community. And been helping several members in the hf community. A few Examples of tuts I have created.

1. bypass mobile security on facebook

<https://hackforums.net/showthread.php?tid=4057838>

2. facebook trick to mass post on people's walls without them finding out you did it and they can't block it either.

<https://hackforums.net/showthread.php?tid=4276920>

3. Facebook redirect vulnerability

<https://hackforums.net/showthread.php?tid=4005910>

4. Facebook destroy timeline and crash mobile users (patched)

7. Facebook crash other people's timelines

<https://hackforums.net/showthread.php?tid=4050298>

8. adding a picture to a facebook post

<https://hackforums.net/showthread.php?tid=4023064>

9. Host files on facebook

<https://hackforums.net/showthread.php?tid=4015679>

10. Aug 2014 -> post gifs on profile on facebook

<https://hackforums.net/showthread.php?tid=4380533>

and several members on hf have verified these tuts worked on the thread upon releasing them.

I have helped some members via skype when they were lost. On hf almost every day trying to see if I can learn something new. I never tried to scam anyone etc. And it would be really awesome if you selected me to win ub3r (which i got accepted already).

What will I do with ub3r -> insert +3s for people who deserve it.

**Innovation.** - August 11, 2014, 5:44 pm

I have been accepted for uber, sadly our family lost over 50 grand from the government from Obamacare and the medicare recall, so we are poor now, and have no money of my own. Uber would mean the world to me. Although I am not a hacker or professional at things, I am a ponderer and thinker, who always wants to give his opinion to people, and look for other views. I have studied Space Science, Philosophy and many more things, including biology. I hope you believe I deserve this upgrade. I made old posts like how to make Crypts FUD w/o paying for a crypter. I have done two giveaways for Netflix accounts, and when people were in finals, I released Netflix accounts to deserving members. Thank you for all your work to this community, and I hope other people are thankful for what you have done.

I really want to get 1337 but can't get the money on my PayPal because it's not linked to a bank account.

I try to give back to the community when I can, a couple of weeks ago I gave someone G-mod because he really wanted the game but had no money on Steam for it, I gifted it to this member:

[Member](#)

I'm really active on the Forum with +/- 9 posts per day and a total more than 800 posts on this forum,

Most of the time on the forum I try to help other members, but because I'm not 1337 or UB3R people hate on me, this is why I want 1337 and hope I can get it..

This user upgraded me to L33T, thanks a lot man, I feel like I didn't thank you enough, so, THANK YOU A LOT! ?

**Hulk** - August 12, 2014, 4:55 am

-Why do I deserve this UB3R upgrade?-

First off all, I try to be as HQ as I can and never scam/troll/flame or piss anyone off. I'm member since October 2013 which is almost 1 Year now. About 3 weeks ago someone wanted to upgrade me to L33T, which turned out he was a scammer and just wanted me to wear his signature. So I upgraded myself which I'm still happy about. I could finally post in the L33T section and give Rep to those who deserve it and edit my posts/threads anytime.

-What contributions have I made-

I always try to stay as HQ as I can, which means that:

-I try to type as correct as possible

-Answer questions if I know the answers

-Not scam/troll/flame or hate/piss anyone off.

-Help everyone, which includes not upgraded members

Rs3 Giveaway - [Here](#)

Rs3 Guide for QBD - [Here](#)

huge HackerCraft giveaway - [Here](#)

I've sold in total 3 HackerCraft awards for a decent price.

-What will I do with UB3R-

I'll be able to enter the UB3R section and participate with UB3R only giveaways. Be more trustable in my RsGP shop, and be able to see others warnings points + what they did wrong. And I'll receive my first award! Which will look pretty cool in my opinion. ?

Proof I've been approved:

**Aur3xis** - August 12, 2014, 5:38 am

Why do i deserve to be upgraded to L33t ?:

During my year on here im helping members as much as i can. I try to keep my posts/threads as HQ as possible! I never flame/troll. Im very hype'd with hacking/coding(HF!) but im still working on generating income from my hard work as affiliate marketer, so it'd be nice to see a L33T badge under my name and help other people even more!

What contributions have I made:

I ofcourse try to be as HQ as possible. 1 of the things i did for the community here was my free updated crypter give-away for L33T/Ub3R i workd for weeks on! Also as told before i help other members alot by rat set-ups coding help, cpa help etc! Other thing was: Giving away free niche-related e-mail lists for free!(Some services take upto 30\$ per 100 e-mails, everybody that requested a niche related e-mail list under my thread got a nice list of 5k e-mails for free ) And ofcourse some small giveaways etc! :)

I didn't maybe do that much for the community, but L33T would be a new motivation to develop something usefull for the community in the breaks between my CPA work! Have a nice day sir ?

**Perfume** - August 12, 2014, 3:17 pm

My leet application, alright, let's give this a shot shall we. Let's stand out and use no formatting whatsoever, wouldn't that be fun? I won't count the words and put in useless paragraphs as other people did, I'll just plain out tell you why I want to be entitled as leet on this forum. Alright, let's kick this off by saying that I am an awesome person, I help people all the time, even if they're annoying as shit (which most are on this forum, just being honest, nothing negative), I had been here for a long time and I know how things work. The upgrade itself isn't that expensive y'a know, I should just get it myself, but fuck, why not take some time and create a post over here, it may just be worth it. I don't have any contributions besides myself being here and giving you the chance to argue with me. Next thing you should know about me is that I'm really surprised that you're doing this, hell, you must really stand up for your "Rich bitch" award, don't you. Well, it's generous of you for hosting this, so if you feel like upgrading me to leet and giving me the opportunity ... bla bla bla ... then I'll truly believe that you're either a retard or a very nice person.

- Why I deserve an ub3r upgrade!

Why am I looking forward to an ub3r upgrade from you. First of all I like to introduce myself, my name is Skotia. I'm currently sixteen, and majority of my time I spend it studying, online, and

hackforums ever since I've been introduced to this awesome forum where I can feel like I finally "fit" in something, be a part of something huge! I've helped out some hf members deal with malware, viruses, and all that bad stuff, I've been a member since June 2014. A friend from school referred me to this site and I've met chill people here with same interests that I thought I would never find. Learned a bunch from this website, it's taught me majority of my skid skills haha. As soon as I had enough money for I33t I bought it and was so excited! Now that ub3r is next I'm taking advantage of this awesome opportunity, I strive to always go with the opportunities.

- Some of my work here. I do plan on doing more

<https://hackforums.net/showthread.php?tid=4383584>

I've upgraded my friend surpass to I33t a while back!

Very inspirational story, I would upgrade this member if I was OP or if I had any money :/

Firstly, I would like to thank LLA for hosting this contest. This is really benevolent!

Hello there, My name is Aravind, in short call me Ara. Internet spans the larger jackpot of my interests and it is really contented to see such an offer. I joined Hackforums a year ago. Although I'm a mediocre member, I'm familiar with the forum and avidly follow the HF activities often (In the sense, posts). I have always offered help, especially when it comes to studies advice or SEO questions (I even made a guide). It is a candour fact that my posts are generally left ignored mostly due to my forum status. I have often struggled to get answers or help when I needed them, where I feel like I'm neglected. To my knowledge, I was never accused for disobeying HF rules (once, which was an accident) and has been acclaimed for holding this stature for a number of reasons. If granted this upgrade, I would be very grateful. With this stature, I'm sure I can continue contributing leaving better impressions and having a larger impact around my circle of posts. Again, Thank you for hosting this contest, My personal appreciation for the contributor.

My works:

[SEO expertise guide](#)

[Glass effect PS tutorial](#)

[Adf.ly, Adf.oc Bypass. No download](#)

[Hack Face book account TuT \(expired\)](#)

There was also a Graphic promo service which was left ignored and I utterly closed.  
Hoping to get upgraded.

Kind regards,

-Ara

Hey mate

This is great contest

Im a 19 Years old guy i always want to know many things about internet ( money making , hacking , gaming and many other things)

im a gamer for about 5 years i can help members in steam , origin and league of legends if they got

any questions

I will contribute anything i know to this forum

i think i should get L33t Because im old HF member i like HF so much ,im active and HQ member L33t wont let ppl think im one of those new members who registered here for getting free stuff (im not one of them )

I always wanted to help others in anything i can do. also l33t userbar is cool i should get one under my name xD

L33t will give me more Inbox size so i can save my messages and more post benefits ( so i can help more members and help myself too) it will let me to close my own threads if there is no need for them, also i need l33t to help the community by give reps to other members, it will let me improve my skills and many things by getting into l33t/ub3r threads, it will let me post feedback on other sections like (server stress test..etc) l33t will help me how? ppl will trust me more and it will help me in my future sales. it will make me real happy if i got in l33t. I don't really have that money to buy the upgrade for myself

HF is always opened in my browser (in pc and phone) even when im in work :)

so i hope i can get this

Thanks again

Hi

I want a change to get L33t too, hope i'm not too late.

Anyway, i've been a member for some years, i've always tried to help people with their problems in what i can, mostly .Net section, Lounge, Pm's and such, i've never done any giveaways but i'm working on plugins for a tool sold here, and working on some projects i may share in the future too.

I would also enjoy the new L33t color (:D) and the L33t forums (who wouldn't?...) anyway, i'm an active member and i help people in what i can.

I am also unemployed and very sad atm, so, hope you read this in a generous mood :p

Thanks LLA.

I'd like to enter for this, thank you.

Application:

First of all, I would like to say a big thank you for offering the chance of upgrading members to L33T and UB3R; it is very much appreciated by the HackForums community. Now, I think I deserve L33T due to me being a HQ user within the forum, as I post with accurate grammar and I am also respected by other people within the forums. I originally came from LSX, however I had left that \*\* community due to me getting banned for a foolish reason. By offering me L33T, I will be more engaged within the forums, and I will feel more motivated to post on HackForums and to also contribute back to the community by hosting giveaways and contests. I am specialized in several areas, ranging from marketing to cracking which can benefit the community in many ways as I can help other members out by giving away cracked accounts, and offering advice. I am a white-hat hacker and I offer PC help to others who are in need for it. I would of purchased L33T for myself, however I am currently low on funds therefore I would highly appreciate you for upgrading me to L33T. Thank you for reading my application.

Kind regards,

**Bagon** - August 14, 2014, 10:50 pm

I won't bullshit you with some story about how I deserve to be upgraded or how it would change my life, I'll be honest here I just would like to be upgraded.

I'm new to being active on here, but my posts speak for themselves. I joined in to leech crypts, freebies, etc. Shameful I know, but I then converted into a member of the community over a bit of time. I'm no incredibly active poster or anything, yet I'm active almost daily and have been for the past few weeks on here. I love to browse and occasionally leave my opinion on something. L33T would be a nice addition to my experience on the site.

My rep also speaks for itself, I'm here to enjoy the site, no scamming or being low quality. That's just not how I like to be. I've had a few successful transactions on here for what that is worth.

In short, I'm pretty new to actually being active, but I try my best to not step on any toes. I'll wrap this up by saying thank you for giving back to the community whether I'm up to par or not.

**Yore** - August 16, 2014, 3:19 am

~Introduction~ Howdy partner, I'm AHoltStudios.

First of all I'd like to talk about the amount of time I've been on HF. I have officially been a member in 129 days or 4 months, 7 days :) I really enjoy being a part of this community.

Enough about that :3!

The question is...

~Who Am I?~ I'm 15, and I'm from Denmark.

I've been doing Graphics for HF members for a while,

I kinda stopped doing it as much, because I started focusing a little bit on programming :)

(I also enjoy helping people on other sub-forums; such as "The Lounge" :3)

However, I still enjoy doing graphics, it can come in handy sometimes!

There might be some grammatical mistakes in this "application" but please bear with me.

~Why do I deserve L33t?~ As I said; I have been doing graphics for members.

I'm trying to help and contribute where I can.

I can't say that I deserve L33t more than others, there's a bunch of very nice and friendly members on here :)

Here's why I wish I was l33t:

I can't change my thread after a certain amount of time, which really sucks because I can't update my GFX threads with vouches etc.

People don't trust me as much; Again, I'm trying to be as friendly as possible, and when some members doesn't trust me I actually get kinda sad/disappointed. (I'm not trying to sound like a drama queen, this comes from my heart)

There are also some sub-forums that I'd like to have access to, but that's just peanuts :)

I also think that my activity on this forum can "elaborate" a lot,

since it would kinda "motivate" even more to help, and contribute to this forum :)!

~Final words~ I don't have a lot in my mind, but this is really kind of you! It's a very big opportunity for me (and others) to possibly get a free upgrade. I really admire you for doing that.

My vocabulary isn't the best, that's why this wasn't a very long application. If I was a native English speaker; I would definitely have made this a longer application<3.

Kind Regards,  
AHOLT

**Fish** - August 17, 2014, 7:14 am

Well this is my third application for ub3r here it goes!

Kogut's Third Upgrade Request For Ub3r.

What is your favorite part about Hack Forums?

Well I first joined HackForums looking for some nice grafics and not thinking I was even going to comeback after, but I instantly fell in love with one of the nicest online communities I have ever came accross. From the get go the user base of the site was very welcoming, and showed just diversity that it was nearly impossible to leave once I entered. HF has every aspect needed to create a good forum, including very sufficient staff, helpful mentors, and very nice members. HF has had such a big impact in my life as my every day intent on HF is to further educate myself in many aspects of the internet realm that I never had before , such as hacking, RAT's, money making, black hat activities and electronics. HackForums is such a great tight knit community, that is very open to newcomers such as I was, but I have developed greatly under the wings of many open armed users. Omniscient has done a wonderful job in bringing diversity to this forum, with people ranging in different expertise from topics from Anime all the way to Blackhat hacking. Some other very unique ideas he has had that made Hackforums a very memorable site to me were his advanced ideas such as usergroups, awards, and very good layout of subforums. I feel that the awards concept is also a very cool idea, as I'm sure it makes members feel just as proud as being

in usergroups, and although it is just pixels, it really gives people a positive mentality when they do get an award. Also the layout and organization of the subforums on this site are absolutely impecable. There is such a fresh and clean layout, and it is so easy to navigate through the site, that even the newest of users should surely be able to find a section on the site that interests them and leads them to staying here. I'm sure with time all this site will do is keep growing and with Omni's amazing ideas will never stop. He has also done an great job at picking

some very trustworthy staff, who even though I have never met them, I would surely trust each and ever staff member with everything I have. This well constructed team surely keeps everything in line, and is one of the biggest reasons that HackForums is such a pleasant experience for nearly every user on the site. I would just like to say HF has really made a detrimental impact on my life, and I would like to be apart of this family for as long as I possibly can, and my stay will last all the way till the end.

One more section I would like to speak about which seems to bring alot of really unique people together into one group is the Innuendo section. As many "12 inchers", "incest lovers", and other types of trolls who live in the deepest abyss of the Innuendo section, every once in a while there is someone who truely does need help, and it comes upon me a very good feeling when the users of the site show a bond and give eachother compasionate words and are able to express eachothers problems. It's actually pretty touching sometimes, especially when someone is in dire need whether it be relationship, crush, or just any type of personal problem, it always seems like there are multiple different dedicated members there to help out anyone in need. That's why as many trolls there are who lurk there, the Innuendo section of Hackforums would be a "must see" reccomendation I would give to any new member to at least check out and see for them selves. The Innuendo and freebies/giveaways section will always be one of my favourite

Things that i have done for the community.

Why do I want this upgrade?

Ive been a member on the forum for quite alot of time now, and I feel that I deserve to be upgraded to UB3R because I've done quite alot for the community, I will do more later ofcourse. :)

I also feel that with becoming UB3R, I feel that I gain more respect within the forum, which I think is just a bonus. Being UB3R has been my dream since I joined the forum and got to know about the different ranks.

I dont just want to get UB3R so that I can -3 the people that deserves it, but actually motivate people that I did this. I managed to get UB3R, without paying for it. And when I post in threads, I try to be as HQ as possible, I am kind to everyone, I won't be a guy just throwing -3's to people, stating that I dont like them. I would rep people fairly, I will use my mind before planting a -3, I will say to myself; "Does this guy really deserves a -3?". Nor will I give people +3's because they're my friends, I will share out my reps thoughtfully and carefully

I'd just like to say good luck to everyone! Thank you for hosting this amazing contest!

**turkish-hacker** - September 3, 2014, 2:59 am

Looks like this contest still runs, so I'm posting my second entry.

First of all thanks for doing this contest and helping the community ?

Why/when/how you got into Hack Forums: I joined Hack Forums 2 years ago, I joined to this amazing forum to increase my knowledge about computers, making money online, to hack facebook accounts ???, Hotmail accounts ??? (but now I am strictly against things like rat and blackhat)

Ub3r approval: [\(Click to View\)](#)

Why I deserve Ub3r:

You can check my giveaway threads and comments in my rep, I everytime try to be HQ and help every forum member.

I want this upgrade so badly to access more features in the forum, and help more the community. Good luck to everyone who entering.

UPDATE 2016: Upgrading more people! Same rules apply! Good luck!

**JohnAnonDoe** - July 30, 2016, 5:28 am

Hello, I'm JohnAnonDoe, I've been a member for some time.

I like to contribute to HF by helping people in the jailbreak and iOS section. I try my hardest with each answer and try to be as helpful as possible. I'm good at helping people solve their problems and I am always willing to learn. I am going to post some tutorials soon on how to jailbreak the new iOS and help people who are confused with the process. I am also learning python so I'll be able to help in that area as well.

I'm generally a friendly person and want to help others. The l33t upgrade would be very good for me as I would be able to use features such as 2FA. I would also be able to rep others I felt worked hard with their post.

Thanks for the opportunity and good luck to everybody else.

Why is this thread special that it doesn't belong in the section with the other leet and uber giveaways?

Mint - July 30, 2016, 7:10 am

It's nice to see that you're back and gifting the community once again.

I am approved for

[x] Reason [x] I have been on HackForums for almost a year. In fact, I joined on the 8th of August in 2015.

I Started out in the [Computers](#) section as a someone with zero knowledge about small things and I would go there to get some help.

After a few weeks being on HackForums, I then opened up my [first graphics service](#) for free to start giving back to the community. It got slightly popular.

When I had learnt a lot more about graphics I asked the community what they thought on my latest project, [Blue Clouds](#). I Saw that the community really liked my work so I decided to open up a paid graphics service as well. With my studying getting in the way this made my job a lot harder but I still got through at the end. I made around \$20. Some users paid more than what the service was actually worth. I also really like helping the community in non-graphic related situations. For example: Helping out a member who isn't very new to this community and needs a heads up of how things work around here and I try my best to make sure that they're up to date.

This is what built my profile and reputation on the forums. It took a while getting noticed on these forums (mostly known for graphics) but it was worth the wait to be seen as a trusted member of the community.

Thank you for reading.

]This is my time spend on HF since i joined...  
Time Spent Online: 6 Days, 11 Hours, 7 Minutes, 36 Seconds

Also i created a free project for the HF community called NuclearLeaks which a  
lot of members loved and support it ...

A small description about myself:

I have experience on RATS, Web Hacking, Little knowledge on Programming,  
Anonymity and Doxing...

Basically my interests are mostly blackhat, I joined HF because i could find  
usefull information about things i never knew , my purpose is to keep learning each  
day so i can become a better hacker...

Why i beleive i deserve this upgrade ?

I really wanted to be upgraded to leet since day one here on HF,  
That would help me a lot on maintaining and updating my threads since i dont have that  
ability right now, Also it gives you more space in your inbox so i can talk with other members

without the need to delete my messages every day.

Thanks for the giveaway, i hope there is enough information here and my post covers the requirements to get accepted...

Who I am: My name is Parker, I'm 17 years old and I joined this site to make money. From what I've learned here I have made quite a lot of money, probably near 1k now total. Back when I first joined I would of never noticed how much of an difference an upgrade would be. One of the main reasons is why I would like the upgrade to uber is for the bigger private message space and the other features that help out a lot!

My contributions: Most of my contributions I do are for the reason of me believing people/ the community deserve them, without leeching off those free ebooks and helpful threads I would of never learned the things I have and people deserve the same. One of my current contributions is my Nutrition/Fitness help desk found [here](#), although it's just a start I have done a few other helpful things to the community and still have plans to do more. One of my more recent giveaways is a semi og kik which also can be found [here](#).

Firstly, I would really like to thank you for the opportunity to get a free upgrade it really is very much appreciated. I know I seem like a new comer and just looking for a quick upgrade, but that's far from the truth. I think I would deserve an upgrade because I'm not just here to leak / general talk I'm also here to give back to the community at the best I can. My giving back to the community will soon expand from a free give away to many other give away / free releases I have in store for the Hack Forum community. I also think that this free upgrade if granted would help me along down this route and give me a little more motivation than I already have to pursue these plans. Yet again I'd like to thank you for this opportunity and even if I'm not chosen for an upgrade I wish all parties the best of luck.

Vouch for this service, homie bought me an upgrade before. :)

**Soonami** - August 1, 2016, 6:46 pm

I don't even know what upgrade I can apply for but here it goes

I first signed up for HackForums back in 2010 (forgot my password & couldn't get a reset). My best friend at the time pulled me into the blackhat scene of Xbox Live & introduced me to the site. I never did much on here besides interact with people who were familiar with my music.

Now, I've returned with hopes of learning as much as I can especially about making money online because I'm broke as hell. My personal life isn't in a great place at the moment but everyday I'm working to get it where it should be. I would expand on that but I don't wish to divulge things that are dear to me.

I feel as though I deserve an upgrade because I'm a very selfless person (I will give back what I can & help others) & I'm dedicated to surfing HF for knowledge / good times. It would honestly mean a lot to me because it's rare that something good just falls in my lap. I've contributed by supporting fellow members whether it be subscribing to someone starting a new YouTube channel or giving my insight to someone going through a rough patch in life. Also, I'm currently working on a song for HF. The thread where I announced it can be seen here -  
<https://hackforums.net/showthread.php?tid=5351040>

Win or lose, you're the bossest of bosses for holding this giveaway for the community.

Peace

Honestly. There's a lot of limitations on what we can say about why we deserve the upgrade.  
So I'm just gonna do this my way like an introduction to my mind.

I've been here for awhile. While a little bit immature and annoying at first, looking through my posts I feel the difference between when I first joined to now. The change was not caused by this forum but it shows me how my mindset and priorities differ which is pretty cool.

While I do have a job and get \$10/hour. I only work like 20 hours a week and almost all my funds go towards my family and my car. I'd rather not spend money on a virtual thing that I can do without

yenno? Just like Amazon Prime and whatever, if I always been doing fine without it then I should be fine staying that way.

But its not as if I don't want it, of course if I was in the financially wealthy part of society's people. I'd probably just these virtual benefits as soon as I'd think of themahaha.

Come to think about it, being upgraded right now would be pretty damn clutch. Since I broke my phone's screen and can't login to coinbase cause of the 2-factor authentication. HF would be my go-to for bitcoins but its not that easy to get people to read your PMs when you're not upgraded also that some tell you to post with their format.

But anyways, I feel like I am a quality member worthy of upgrading that will stay for several more years.

I'll be applying for 3p1c, because my application for ub3r is still under review.

I go by OBJ, and I have been lurking here for awhile but just became active recently and would love to have the 3p1c upgrade, as I don't think I'll be able to get it myself for a good amount of time. I love to browse the forums and love to play xbox. My favorite games are Madden, 2k, and Smite! I play a lot and am currently waiting for the new xbox to arrive at my house sometime this week that I had pre-ordered.

I'm 17 years old, and I'll be 18 in 4 months. I originally joined to buy a gamertag a long time ago but I just ended up lurking around and as of late I have noticed the site is really addicting and I can learn a lot from it. I would love for this upgrade so then when I get approved for ub3r and buy it, then I don't have to buy this and it would be pretty cool to have them both. Sadly I don't have many contributions, the most I have done is gave away my signature space which isn't much aside from helping others in the pokemon go section. I would love to contribute more in the future as I spend more and more time on here.

Thanks for reviewing my app, Bronx. ?

Here is my App:

Yo! Wassup! I think I deserve l33t because I could definitely contribute to and help out the community better. I think it would be awesome to be able to rep people, seeing as how many people deserve to be repped. I could expand the storage of my PM inbox, which would potentially help me with my upcoming services, (video editing, GFX, design, etc.) Seeing as I am on this site constantly, you purchasing this for me would not go to waste. Thanks in advance, and good luck to the other users!

Contributions (just two, but one was pretty informative to community regarding Nintendo's Piracy locks on their newest games, the other one was small, but I guess it still counts as a contribution)

I've always loved the community here at HF. I also love to enter discussions here on the site and help out as much as possible. I've been extremely active in the Pokemon Go forum whether it'd be assisting other members, posting coordinates to Pokemon or just talking about the game. I've always been one who has liked to give more than to receive so I always prioritize others over myself since I want people to be as happy as I am. I originally started posting only in the Pokemon Go section because I wanted to get into botting, but now I see myself posting more freely around the site and I'm attempting to become active on HackForums in general. I have skills such as retail training with Intel products, graphic design experience, motion design experience and great knowledge of video games. My skills come to play whenever a member of HF may have a problem as I may have a solution or whenever someone may need an opinion or suggestion I have an answer. I'm on HF not to make money or anything like that, I'm just here to have a good time and help people while I'm at it. I feel as if an upgrade would allow me to reach further into HF and help me get to know more people around the site. Thank you for doing this and thank you for reading.

Hello! This is my application as to why I deserve 3P1C ;3

I absolutely love this forum! I first joined when the day of the gamertag reset happened and I started to lurk around HF and I slowly became addicted to HF and the community itself. I have truly met some great people on here that have helped me out in so many different ways that I couldn't even have imagined. I have been here for only a little but so far I have learned so much about stuff I had no idea about and only plan to learn more and more. I am on here every day and I just can't get enough of it. I'm constantly posting all day long on almost every section of the forum so 3P1C will truly help me out with the cool down timer. I think I deserve this because I consider myself to be a very active member on HF I have 0 dispute deals on my profile and I am an all around great guy when you get to know me. Another thing is that I am constantly pming and I am currently about to

reach my limit and 3P1C will truly come in handy at this point in time xD.

I am not the best writer in the world but nonetheless thank you so much for this chance.

Thank's a lot for considering me for an upgrade and for taking the time to read what I had to say! ?

Edit: Forgot about the contributions xD well to be honest i haven't done any per say but i do plan in the future when I'm more financially stable :)

### Application 3

When i first came on this website every day i tried to find new ways to make money. No matter if it was referrals , ewhoring , selling accounts anything. The more i came on the website the less i was finding so i took a break for a while and came back. I found out there was a lounge where people talked and talked to a few people over HF and saw how nice some people were on this website and found a couple methods so i started visting the website more often. Over the months i had found a couple ways to make money and posted them but nobody really seemed to view my threads or trust me but i noticed many Ub3r members had been trusted and were able to post in certain sections so from that point on I've been trying to get my reputation better and being more helpful and kind to people on the website so i tried changing my whole view on this website from just first getting on here for ways to make money to talking to people about things in life and ideas. The main reason i want Ub3r is to have a better market. I want people to try my products and give me feedback, I want people to trust me, people to vouch on my threads, just for me to look at that Ub3r badge and know how far i have come from all the ebook buying and methods on top of methods I've bought to try and get the money for Ub3r and everythig else . With this Ub3r badge i will be able to start a whole new chapter on hackforums for myself and other users who work with me and recieve feedback or even just having conversations in the lounge.

Ah, I mistook the word limit and interpreted it as a character limit. I'm sorry, my last edit was made.

I think I deserve an upgrade for a few reasons, first let me say that I joined this forum to improve my python skills and met many great users that helped me become more experienced in coding which was hard as this was the first language I had attempted to learn. (and also I have even been accepted for a job in October thanks to the help of these users) I always try to help users where I can for example i have done bitcoin transaction for people and also helped them setting up bots or fixing python scripts. I have also given back to the community as after all they have helped me a lot, I did this buy giving away csgo skins and also small amounts of bitcoin. To this day I try to help people out where possible and plan on doing giveaways in the near future. Hopefully I can pick up more skills here on hack-forums.

]This is my time spend on HF since i joined...

Time Spent Online: 6 Days, 13 Hours, 11 Minutes, 23 Seconds

A small description about myself:

I have experience on RATS, Web Hacking, Little knowledge on Programming, Anonymity and Doxing...

Basically my interests are mostly blackhat, I joined HF because i could find useful information about things i never knew, my purpose is to keep learning each day so i can become a better hacker...

Why i beleive i deserve this upgrade ?

I really wanted to be upgraded to leet since day one here on HF,

That would help me a lot on maintaining and updating my threads since i dont have that ability right now, Also it gives you more space in your inbox so i can talk with other members without the need to delete my messages every day.

And most important is that i dont have the money to upgrade

**Vassilios** - August 2, 2016, 1:28 am

I know there will be members that deserve Leet/Uber more than me but I am going to give it a try. When I joined HF I was not really active at all and I left, a few months ago I came back and since then I have been trying to help people as best as I can. At first, I was on the e-whoring section since I have experience with it and I have been posting packs and helping members there, after that I got Leet and I have been expanding in other section such as Lounge and the Pokemon section to communicate with more people and generally have fun. Anyways to get to the point I am as active as I can which is a lot, I try to help people and my dreams some day is to make a free middleman service but in order for people to trust me more I have to become an Uber so your upgrade would help me a lot. Thank you for reading my application and good luck to everyone else!

I don't know if I got denied or you just didn't see my post lol

**STYLING** - August 2, 2016, 10:21 am

Hey there, my name's Styling. I'll be applying for the 3p1c usergroup since I'm denied for Ub3r (Applied when I was just starting out, so didn't really know what I was applying for back then)

I think I deserve it because I try to help out whenever I can. Every day I tend to help people with Counter-Strike/RuneScape/Pokemon-GO related issues because these are the subjects I know the most in. I sometimes drop by the Hardware forum to help, but that is a subject I know less in.

As for Pokemon-GO, I help users by giving them the specific co-ordinates to a rare pokemon. Although there are websites who do that, I helped dozen of users with my own found pokemons.

I currently offer a free service to help other users out, and I will link all my contributions to this wonderful community. Cheers for giving back, you gave back so much to this community, so cheers!

I tend to continue helping this community and even benefit it further by doing giveaways in the future.

My contributions:

<https://hackforums.net/showthread.php?tid=5321994>

<https://hackforums.net/showthread.php?tid=5316221>

And a plethora of Private Messages that contain my help to specific users. I tend to PM users with their specific wanted solution rather than post it to prevent confusion.

Thanks.

Interesting, sorry about that. I couldn't see anywhere on the post how I apply.

**????Kosdff** - August 2, 2016, 5:18 pm

I deserve to be upgraded on Hackforums because I am a fairly new member, I would like to help this community gain information from me, and I would like to look "Official" on Hackforums. Before I get into my application I just want to say that what you are doing is wonderful and GREAT for the Hackforums community. Not many people have the time or money to do this so I sincerely thank you for doing this.

---

So I am fairly new to Hackforums. I have been around for a couple of months now and I want to start using this form A LOT more. I'm active every other day but want to be active everyday. When i'm on Hackforums I mostly do my travels to the Graphics and Advanced Hacking sections. I have done one tutorial on making a text encryption tool in VB.net but it wasn't the best. This was my first thread on Hackforums and I have learned not to use so many goddamn color codes.

I have recently reached 50 Quality post and I now can post pictures in my threads to help people in future tutorials!

---

Looking official on Hackforums has always been something I wanted since I joined this community. Looking official has many benefits as in trust with downloads and it gives you that "I know what the fuck i'm doing" look. Since I have not been upgraded on Hackforums I feel people tend to not take things I say seriously. This can be frustrating but a motivation to save up money and get an upgraded account. However this is also an issue for me as I am very poor online.

---

Well thank you for reading my post and hopefully this will persuade you to upgrade me! Best of luck to you :)

**Juuzou Suzuya** - August 2, 2016, 5:46 pm

Why I believe I deserve upgrade:

I've been a member of the Forum for a while now, I've recently just got back into the Forum due to some issues resolving home and school but I believe that even though my reputation may say other wise, I am a High Quality member. This upgrade would mean a lot to me due to one reason and one reason only, it'd help me be able to reach out to more people. I do general designs on Photoshop and I am hoping to get back into that when I am up and running in my new home. I've loved this Forum since I've been on it, there are so many different people and different Ideologies that are extremely interesting. Each person has their own set of ideals and beliefs and I believe that I, myself have a strong sense of values that other people can benefit from.

Right now, I may not have a lot of High Quality contributions and I get that but I haven't had the chance since I came back around, I mean I've done a Sig service but shortly after that I had issues at home and school and I couldn't complete requests so I had to shut it down sadly. Over time I've gotten better at it and I'd like to at least have the chance to open it back up and do a whole bunch of other things.

The reason I'm asking for this upgrade is because I just don't have the money to do it right now, I'm going to College in September for Software Development so in my off time I'll be making contributions and threads about informational technology but all in all I've been accepted for so long

I just need the money to get upgraded and this seems like a good way for me to get that done.

Anyway, I hope you consider me as one of the people you'll upgrade :) .

~Thanks for this giveaway or gifting service :p

I'm not going to lie, I haven't been a member for very long at all. Probably around a week now but I have already made a lot of contributions to members on this forum. I strive to be high quality and I try my best to get along with every member I come across.

Hackforums for me, is great. I'm planning on also writing up a few E-books & tutorials that will be free, so users don't have to worry about paying for something that might not interest them.

There are a few, and you can also look through my posts if you want to, feel free. I know your opinion may change because I haven't been a member for very long but I feel that L33T would benefit me in the manner that people will take a look at my threads more, I can then do member contests and I can then have the chance in the future to become ub3r.

When I first started, I was constantly helping people out in the Pokemon GO section and earned myself the Pokemon GO award which is 1/250 chance I believe? Anyway, it's up to you mate. I look forward to hearing back and I want to thank you for the opportunity you have given me/everyone else here.

**Zappas** - August 6, 2016, 4:43 am

Hello, I would like to be upgraded because of the few reasons. Firstly, other members always prefers upgraded members (or with a lot of awards in your case), which is hard to do some bussiness. Secondly, to post something in Premium Sellers Section is required to be upgraded member. But the biggest reason why I want to win this contest, is because I love being member of this awesome community, and hoping that one day, after I will get some brilliant money making idea, I will be able to host same contest and help others.

**Goku** - August 6, 2016, 5:13 am

I have applied for UB3R a while ago and got accepted almost immediately, so I would like to get upgraded to UB3R.

The only reason I want UB3R is because it's the highest upgrade and I would love to +3 people, means more than +1 rep in my opinion and to junk my own threads. I use HF every day so to be UB3R would be pretty chill and would make HF more enjoyable .

I am almost two years on HF and have a pretty good reputation on this forum. I have made tons of paid & free designs for people and helped a lot of people with their design. I have won a contest for L33T & 3P1C, so I hope that I am lucky enough to also get UB3R. I haven't done much of giveaways but I helped a lot of people so I hope that counts too.

Thank you for this giveaway OP!

So if a person gets ignored then he doesn't win it i guess?

**PI0x\_** - August 6, 2016, 6:05 am

My account is pretty new to HF as you can see coz I will often forget my passwords and keep creating bunch of new accounts. My first HF account was created in 2013, and the reason I kept on

forgetting my password is because there is no shoutbox,leaks or cracked applications. But now as I'm growing up, I felt that having leaks or cracked applications does not benefit me. I need a forum where I can find partners,investors, and gain knowledge as I'm creating a new cloud site. I have learn quite a lot of things here thus I've decided to stay on as I saw the potential of this forum to be a business marketplace.

I'm kinda short of money to buy a rank in HF as I'm heavily invested in my cloud site. Dedicated servers, DDoS Protect fees,Domains,Cpanel license and SolusVM all cost alot of money.

Although a few dollars is little to you but it worth a lot me. I need a rank to PM people and post replies on sections that requires a user to have a rank.

**Zorori** - August 6, 2016, 8:30 am

First of all OP I would like to thank you for doing this for the HF community, your contribution is appreciated greatly. The reason I am posting this application is because I would appreciate the chance to obtain the I33t user rank. I am a new member however I would like the chance to have the user rank that enables me to post in the giveaway section so I as well can give back to this community which so far has helped me out a lot with all the information users have provided. I do not deserve the rank per say but it is something I would really like to have. I have not exactly made any contributions as of yet both because a lot of the questions users have here have either already been answered or their questions are out of my knowledge range. I feel that if I had the user rank I could contribute greatly in the giveaway category for on Steam I have gave away CSGO case keys as well as knives and it really felt nice to help people out there and I feel that it would feel nice here for both I and the recipients of the giveaway prizes here. Regardless if my application is accepted or not I still plan on trying to help the community to the best of my abilities. Again your generosity is greatly appreciated. Stay HQ OP.

After reading most of these apps, I can't help but think if people who do upgrade contests make these for laughs.

Honestly, the content in these are so funny ahahaha

**Stork** - August 6, 2016, 11:59 am

I'd like to be upgraded to UB3R please, I have been on this forum for a long time and have contributed greatly to the SRPP section. As-well as referring 6 members to the forum.

Here's some threads I have made over the years.

Hello! I'm currently a l33t member. I have interests in vices, health, fitness, coding, and crypto currencies.

I'm attending college this year to further learn , and am majoring in engineering.

I make all my money irl at the moment, but i instantly convert all my profits to btc to trade and hopefully make a bit extra.

I come to this site to learn, to give advice, and to experiment with others who share my passions.

So far, this is my contribution:

I hope to become l33t to further expand my horizons. I hope i get picked. thank you.

**Tyrro** - August 9, 2016, 7:10 pm

Hey, I just got approved for Ub3r so I thought I would give this a shot.

I first signed up in 2013, but back then I was only a lurker, reading tutorials, downloading free stuff, posting on some threads occasionally, a casual member I guess. However, during the last year, I changed the way I approached this forum in general. I now try to be a part of the community, rather than just being an outside lurker.

I consider myself to be a really nice guy (name a swede who isn't :)). I've been helping out quite a few members with free graphics, anything from complete web designs to signatures and various photoshop related tasks, as can be seen on my rep. I also try to stay active within the different gaming sections I'm interested in to provide tips and tricks as I'm highly rated in most games I play.

Thanks for the opportunity. Please disregard any spelling or grammatical errors.

**Faith Connors** - August 9, 2016, 10:10 pm

This looks like a great opportunity for me!

First if all the only reasons I want to be upgraded (l33t preferably) is so I can change my username, as this one was made by throwing my keyboard down the stairs, have 2FA for the extra security, and for PM space.

Now, I'll give you a little history about my time on HF. Let's start at account creation, early 2013. I was in high school, doing normal skiddy shit. I registered on hackforums so I could download the abundance of free tools available in the Hacking Tools section. Sometimes I went into the beginners section but never really understood it, or tried to understand it. Anyway, there were some cool tools that I found here, but I stayed with some DDoSers and just knocked off my school's site for fun. Of course, it got boring after a while, summer came, and I quickly lost interest in doing anything related

to hacking.

I was inactive for about three years since registration. I came back in February of 2016. I looked around the tools section, downloaded some RATs and decided to play around with those. But I needed a crypter that worked. I saw one called Xcrypter that needed your HWID in the thread and then needed you to wear a signature. Well I tried, but only had about twelve posts. So I started to be active in the forum instead of lurking and leeching. Then I moved out of the tools section. I found the groups section. Back then I was into gaming, not as much anymore, but back then yeah, so I applied for fusion because it had a cool username and fit my interests. I didn't get accepted. I didn't even hear back from the leaders or owner. It was a little discouraging, but whatever.

Then an angel descended from the heavens. This angel's name was Deeg. He's the guy who gave me my first rep. He saw that I was posting everywhere to get my post count up, and noticed it was the first time in three years that I've posted. He asked why, to which I responded with my story, and that I wanted to feel like part of a community. I told him how I applied for fusion and got declined. But his message made me feel like I was part of something bigger. A society. A community.

When I sent it back to him, he was a little surprised with how much I wrote, but returned the favor and gave me a shiny green apple. Now I'm here today with 67 of them, but I have 3 red apples cancelling out 3 of my greenies. Oh well, what can you do.

Now, where do I stand?

I got my CEH and now with a better general knowledge of things, I've been helping out with answering almost all the questions in the Beginner hacking section. Some notable examples include, but are not limited to:

<https://hackforums.net/showthread.php?tid=5369452&pid=52028022#pid52028022>

<https://hackforums.net/showthread.php?tid=5369153&pid=52024334#pid52024334>

If you just take a peek in there, you'll see I respond to most threads, and it's usually the end. The original poster gets their answer. I also help people out personally over PM and over XMPP and skype. I'd rather not share that stuff though because I don't know if the users want it shared.

I've been considering starting a group now for some time, unofficial of course, and I've finally realized that dream, now that I have a bit more time. I won't be working for the next few weeks so I can dedicate some time to it. You can find the thread in the groups section and the group is called Catalyst. It's probably not that important that I'm mentioning this, but it's just where I stand right now as a member.

I've been active on some other forums but this is probably my favourite and I'm gonna keep coming back here.

Thank you for reading, even if I don't get the upgrade it feels kind of good to get it all out.

EDIT: hit 70 - 3 = 67 greenies now because True Demon noticed me <3

**Elric** - August 10, 2016, 7:05 pm

Hello.

First I want to start by telling you what you're doing is incredibly generous (But I think you already know this) and even if I don't get accepted, I appreciate that you're giving HQ users what they deserve.

I originally joined HF looking for knowledge and took any advice I could and I'm still rolling, currently learning Python. The issue here is, well, I can't be taken seriously due to the fact I don't have a fancy tag or a huge number of posts which can be extremely problematic for someone searching for knowledge. My end goal on HF is to become a HQ user who can help those who start out like me, searching for knowledge and only get sarcastic/useless responses. With this 1337 tag I can have access to change my posts in case I said something I don't like and want to have only the best quality posts that I can change at will.

Finally, my conclusion for this application is rep. I want to give users reputation so other users can judge the user by my experiences, something I can't post without a 1337 tag.

I also made my first guide recently, it's simple but in my field of knowledge.  
</showthread.php?tid=5370815>

Thank you and I hope you will take this into consideration.

???? - August 11, 2016, 12:18 am

Hello, I've been a HF member for a couple of years now and I have recently took a break from the site because I got caught up with life. What brought me back to the site was Pokemon GO. I was brought into this community from a friend of mine that showed me this site because we played Halo 3, and showed me the gaming section which I've met some cool friends. As you can already tell, I'm a huge gamer. When I first started here, I felt really out of pocket because of my "new" status, I was assumed as a "multi" account. I tried hard to show that I wasn't buy offering help in Halo 3, boosting people in Ranks and free exp. I always wanted to help in the gaming section because I felt that I was able to help people who needs friends to play with. I was eventually getting somewhere with this service. My goal was to eventually prove that I wasn't by helping people in the Halo section. People now may not know me but I can name many of the players I used to play with. After a few months of being an active member in HF, I bought l33t to treat myself lol

After my l33t, I fell off from the site, life was hitting me hard with school, family and other personal problems that I had to take care of. What brought me back here is because of Pokemon GO. This is the gamer in me!!! Anyways, I valued the gaming section a lot. I treated EVERYBODY with respect. I find myself to be a high quality member, always shared my advice and ideas to others. Always showed my gratitude to others. I'm still roaming the gaming section to play with people who are looking for people to play with. I enjoy having fun with everybody here. Xbox section was my go to back then.

Maybe I wasn't contributing at all to others, but I feel that my offering to play with people who needed company counts toward contributing. I don't like hearing my members struggle in a video game so if I have the game, of course I will offer help. Eventually they pick up enough where they can enjoy the game! What game is fun without having friends to play with, right?

Yes, I know my post count doesn't match my date joined, like I said, I was going through a lot in life, had to reconstruct myself as person to be better for me and for my surroundings. I never learned to hand e-books, monetize money for people, hacked accounts or any other intricate computer activity because I can't do that, but just to offer my kind words ideas, advice, tips, skills (referring to Xbox Live lol) and to share my positive vibe with others.

Just like many other people out there that wants to win this contest, I truly wish you all the best luck and thanks for taking the time to read this. Regardless of my status; multi, l33t, or un3r, nothing is going to change me for the helpful and supportive human I am today. I will continue to do what I've been doing before.

Good luck everybody, wish you all the best!

Also, OP... you're doing a very great service for the community here. (No, I am not kissing ass because I truly appreciate what he does for everybody here and I say that to everybody who's done a lot in the community. Someone needs to show some appreciation here instead of a," thanks OP" lol.

B?ker - August 11, 2016, 9:06 am

First off let me say thank you for this B ronx, I will go ahead and explain why I feel I should be upgraded, so I came to Hackforums original to help the community, with giveaways tutorials (still being typed as of right now). Some of the tutorials I will be making are related to Full Stack Web Development an area I have been in for quite sometime, as well as assist people with various things related to iOS, MacOS and more. So far I have hosted two major giveaways.

<https://hackforums.net/showthread.php?tid=5361733> (Still open), I have been a user of Keybase for a long time on my original account, and have talked with the two founders and they gave me 500 Keybase invitations, originally I was gonna sell these for like \$.50 but decided ultimately against that and decided to just give them to everyone as I have 500, more than enough. So I have given only 40 away.

<https://hackforums.net/showthread.php?tid=5367756> (Closed now) So I originally I planned on hosting four giveaways as I had four keys to spare, since only two people asked me for them I gave them both a key, then two more came to me and expressed how they wanted to play the game so bad but couldn't afford it so I gave them it as well.

**Kyrus** - August 12, 2016, 10:47 am

How do I reapply?

I feel like a changed person but do I just like post for you to look at me since I've already submitted an application before or do I have to make up an application again?

I'm confused.

But if thats the case, then here's my reapplyment ahaha

**Pez\_** - August 12, 2016, 11:12 am

Hi,

Let me introduce myself, my name is ConsoleWizard(I would like to change my name to Moncler but due to being skint I cannot afford to change my name) anyways. I originally joined this site thinking I was gonna become a pro hacker and this site has taught me that you need to take things slow and good things take time. I originally started in the ewhore section over a year ago when I was making a nice bit of money but stopped due to paypal catching on. Now I have returned and I am gonna stay for good, I mainly focus on the gaming side of the forum at the moment but hope to contribute more to the social media and web section. I would like the upgrade as it would give me a reason to keep on coming back and try to make a name for myself being helpful and trying to improve the community and teach people how to make money so I will be able to give back to the community just as you have done. I hope that you will choose me so I can change my name and really start to get noticed on this site and help others as thats what I am all about. Thank you for giving the chance for me to get an upgrade I hope I get picked.

Thanks!

-ConsoleWizard(Hopefully soon to be Moncler)

~ **Left HF For Good** ~ - August 16, 2016, 3:21 pm

I would love to win the L33T upgrade. Well why do I deserve it you may ask? Well, I think that if I had L33T, I would be able to contribute more to the forum. I would be posting more on every forum, helping out in groups, and hosting more/better give away's! I spend every day on HF, and it is honestly addicting. I would also love to be able to +1 user which deserve it for being HQ, as well as warn users about scammers. I plan to contribute much more to this forum as time goes on, and I think if I had L33T, that could help me out a ton!

**Draako** - August 16, 2016, 8:28 pm

Id love l33t because i would consider Me pretty active on the forum.

**djsp1k3sm0k3r** - August 16, 2016, 8:34 pm

A L33T upgrade would be pretty awesome to have. I have been a long time active member here on HF and honestly can say that I have learned quite a bit from my time here. I have contributed a bit by starting adsense exchange groups that really made some cash as well as try to help out others when possible if I know an answer to their problem or questions.

**TheWhiteHatter** - August 17, 2016, 6:17 pm

I want to be upgraded because I want to sell my services and have more access to the forum.

**Zliq** - August 17, 2016, 7:12 pm

Hey man, hope you see this!

This is my application for L33t

My Profile:

Zliq

UID: 2925300

Why do I think I deserve L33T upgrade:

I think I deserve L33T upgrade because, I've been helping out many people as I can on HackForums so far. Started from dealing with people problems that I would love to solve daily and answering questions which many members may have. I try to do my best most of the time to help out each other especially if I know how to. I would really appreciate this upgrade! Not only for me to feel known but to feel trusted as well. I'll keep on trying my best to help others with/without this upgrade. Many people do not trust non-upgraded members, no idea why but thats actually sad for them. Especially those who can't get upgraded. If I ever get this upgrade, I intend onw being alot more active in helping members and start giving away my own programs. It will be awesome to have extra abilities such as access to L33T section of forums, having extra space etc. I would really appreciate this and thank you for taking your time reading this man! You've been doing a great job so far, its hard to find people like you! Thanks alot

Contributions made to forum:

I help solve as many players issues as possible. I try support others who actually need help, sometimes I may not know how to help so I usually go research about the problem then come back and help them out. I'll keep on trying my best to help out HF members!

Extra stuff I would like to say:

Thanks alot for hosting this man! You have given me a great shot to become what I've always wanted to become. Thank you for taking your time reading applications of people, thats actually great! Thanks alot man and congratulations to all those who have gotten and goodluck to others.

**Omig** - August 20, 2016, 6:13 am

Posting to enter the contests.

I am new on HackForums.net , I'm here to learn about hack stuff , and making money. Non-upgraded members have less features than L33t. That means L33T can get more stuff , there are so many giveaways only for L33t and other upgraded members like uver , epic etc. Upgraded members can learn the money making methods easier and faster than non-upgraded members like me. There is no reason why I deserve to win more than someone else. But I want to be L33t , so I can learn easier and faster. I'm new so I don't know if L33t members can help in a way that non-members can't , but if they can I will.

Thanks for doing this contest.

**UTRONEX** - August 20, 2016, 4:59 pm

I'd like to go in for the ub3r upgrade please, I'm approved :)

Thanks man

**yotoprules** - August 27, 2016, 4:22 pm

Hey!

I would like to upgrade to L33T and hopefully make some bigger contributions to HF in the future! I have been here since March 2016 and I have to say I absolutely love this forum! It is the only forum I am active on, and it has giving me so much ever since I joined!

My contributions

As you can see in my signature, I help people with their RAT's, removing some malware, and other stuff that I am knowledgeable about, and I do it for free! I have also made a couple of other contributions, including a free direct link uploading website, which got suspended a few times because the web hosts didn't allow the files that were being uploaded to it. I hope in the future be able to get a offshore host and start it up again!

Another contribution I did was a free VM for people to control, basically a free public vps/rdp, that anyone could access. But due to skids trying to DDoS my IP and the lack of attention it got I do not offer that service anymore.

I hope to win L33T, and good luck to everyone entering this contest!

EDIT: wow, didn't realise how long this post was lol, over a thousand letters!

**Herodionus** - August 27, 2016, 5:20 pm

Looking to enter, started less than a month ago and in that time I helped people with issues I was knowledgeable in, I had 1 deal so far and went smoothly (if you want I can send his profile to confirm). Also in the short time I was here I have gotten 10+ rep, and no negative rep. I believe I can contribute better if I was upgraded, but I'm currently studying and don't have money to spend, I could give positive rep to those I've dealt with and so clearly deserved it. I'm also very into politics and science, and if I had access to the forums I could contribute even more. Hoping not to sound vain ? but overall a HQ user (again can send people to vouch for me). As a side note, thanks OP a lot, true HF contributor, wish there were more like you.

Thanks again

**Sharjah** - August 8, 2017, 4:46 pm

Bringing this back! Feel free to join!

**Infinitum** - August 8, 2017, 5:02 pm

Well, I'll try my best.

As I am not approved for UB3R and I will not for some time due to my lack of reputation and posts, I am going for 3PIC. Why should you upgrade me? Why do I deserve it?

I wouldn't necessarily say that I am the most HQ or mature person on this forum. However, I have a lot of knowledge in different topics, varying from graphics and video editing to product

marketing/advertising.

I try being as useful as I can, and started a free graphics service... which, I must admit, did not go well in my honest opinion, as literally 2 days after I opened it, I had so much going on IRL that I couldn't even do the simplest of orders. So much for being useful to the community.

I strive to become a reputable person on this forum and become someone you can have trust in (I do not see myself a good person to make business with, which means that I still and will always need to work harder to actually achieve my need of perfection, and I'm far away from it).

I've bought some things on the market and will probably start selling in a few weeks a few services and products, which I hope will be appreciated.

note: I am in no way saying by there that a upgrade means anything in terms of trust or reputation on the forums.

In conclusion: I think this text is a bit too short indeed, I sincerely even don't know if I am allowed to enter for 3PIC, but I'm a immature retard who likes to try stupid stuff.

**Ram** - August 8, 2017, 5:13 pm

Hey there,

I'd like to get back on l33t crew, been on this forum since 2008, back in the day I was l33t when it was a 1 or 3 month membership and it costed like 5\$ for that time. I'd mostly enjoy the features that it gets and access to membership forums and I'm gonna start a new business on this HF so it also helps so I can post in restricted forums for upgraded members and that I can edit my topics which really helps with updating my stock, right now I have to remake my topics and that kinda sucks cuz I cant edit after 24 hours! This is the reason why this will really help me. Thanks for this giveaway, and I'll keep doing my best for this forum being one of the oldest members still here! ^\_^ Cheers bro!

**sassy the sasquatch** - August 8, 2017, 5:26 pm

Having ub3r would mean people would trust me more which means I could conduct more business on here and possibly stop selling illegal merchandise to pay my rent. /application

Thank you.

**Cain\_** - August 8, 2017, 7:57 pm

I would love to be l33t upgraded because I help anyone who needs help to the best of my ability and i will continue to do so. I am always positive about every situation. This upgrade would mean a lot to me.

P.S - Thank you for the contest, congratulations to whoever gets upgraded.
