Thread: [Stresser \(power management \)](#)

Errors - August 10, 2014, 10:37 am

Hello,

I am currently getting ready to launch my current project Stresser.org . I am looking for a partner to mostly help manage power and get sales. If you are interested and also have some knowledge in the SST section feel free to pm me here.

Code What are your specific skillsets that you plan on using in regards to Stresser.org?

What would you be willing to invest into the project?

Current and past projects(link threads and what your involvement was)

Whoever I do end up selecting will not be the sole investor, I do have the funds to launch but am expecting a really big turnout so the more prepared we are the better.

Mostly looking for somebody to manage the servers

I have been looking into stressers for a while

What all could you bring to the table and what makes you different from the others that have your "skillset".

I have been doing this for years

What would you be willing to invest into the project?

100\$

Current and past projects(link threads and what your involvement was)

None

Coding/Server management

What all could you bring to the table and what makes you different from the others that have your "skillset".

I've ran my own stresser, so I know how the work inside and out, as well as a hosting site (giving me server management skills and customer support)

What would you be willing to invest into the project?

We can talk about this.

Current and past projects(link threads and what your involvement was)
<https://hackforums.net/showthread.php?tid=4385840> - Created it
<https://hackforums.net/showthread.php?tid=4374596> - Coded
<https://hackforums.net/showthread.php?tid=4376602> - Codes (not the APIs)
<https://hackforums.net/showthread.php?tid=4366892> - Coded
Coded multiple auto buy websites/netflix generators.

i can manage servers

edit / improve / code website stuff

provide support / live chat

set up every script / scan for amp list

sadly i have a lot of time but no money to invest (not right now) :P
