Hello i am having some problems right now with skype resolving skype accounts!

Can some one help me?

I am using the following websits:

<http://mostwantedhf.info/>

<http://www.hanzresolver.com/skype>

<http://www.speedresolve.com/resolve.php>

My second question is can i track down Lol players?

You didn't tell us what the problem was. You should probably do that first.

I think the API is down, I tried using skidresolve.com earlier and it was down. Pretty sure they all use same API.
