Thread: [\[Release\] SQLi Helper \[Automate The Boring Part\] \[0/54 VT\]](#)

Yorkiebar15 - August 11, 2014, 5:30 pm

Greetings HF,

Recently I've been doing a lot more SQLi than usual simply because I'm so bored. Boredom is not helped by having to manually type out and convert the boring parts such as the long 'UNION SELECT' statement, and using encoded/hex values of various characters, so I thought I would make a small tool for the occasion.

This only took me a few minutes to make, so let me know of any bugs you find.

Here's a screenshot;

Of course, credits for the theme go to the theme creator, found here;

You can download the tool from here;

(Used VirusTotal because there is no virus to hide :P)

Take care!
