Aldrin5379 - August 15, 2014, 6:49 am

when I press the 'download' button bitdefender blocks the download link...I guess I'll bypass that and download it anyways, if no one else is having any trouble. I'm using virus total on it right now, I'll post the link...

I guess I'll wait to see if my computer has trouble or if bitdefender deletes it...PS: The detection ratio of 45/54 makes it a safe rate of 11.11% safe, I think

nerdz - August 15, 2014, 4:13 pm

Wow i dont know what to think ?? Aldrin makes a goood point.

Look at the date this thread was started..

also look at all the previous comments. the only people that vouched for the stupid thing are LQ

members with heaps of negative rep... most likely fake accounts of OPs friends. Downloading this thing would most likely infect your pc.. Be cautious in the future

Detection ratio: 45 / 54

Can someone please check this on a VM?
