Thread: [Scammer - 100\\$ Scam - uid=1066842](#)

blastgoesin - August 12, 2014, 9:52 am

This user scammed me <https://hackforums.net/member.php?action=profile&uid=1066842>

First of all the deal was i would pay him 100\$ for him to setup a botnet for me with 500 bots and he would setup a silent miner for me that he promised, and he also stated that i would be making 100\$ per day

what went Wrong,

Right after i bought the botnet and bots i told him i did not know that much about botnets and if he could help so he did he setup the botnet and he said that he ran a task and i was going to be getting 500 Bots he even screenshotted it

<https://gyazo.com/ea92133d77e2eb19e12fbcc2bcf4a305>

I only received 200/500 bots and his excuse was that my file was not fud first of all he never stated that i needed any type of fud file he did everything himself he setup the bot and made all the files himself he could have sent me the non fud file he had i had a crypter waiting but no he ran the server and got me 200/500 bots smh.

The user also Promised that i would be making 100\$/Day with 1k bots
the problem is even with 200 bots running the silentminer i was making 0.01\$ per day not even 1/4th of what he promised his excuse "i dont know what is the problem"

Overall this user just took my 100\$ and left with it, it is very upsetting to see this simply because the fact that he fucked me over.

Skype Chat Proof

<http://prntscr.com/4c3xl8>

<http://prntscr.com/4c3xsm> (He gave no support and ignores me)

<http://prntscr.com/4c3y9p> (Proof of him saying he built the server for me)

<http://prntscr.com/4c3yot>

Nobody - August 12, 2014, 9:58 am

um i think its common sense to have a FUD File lol

i know right i have a fud crypter could have easily crypted the file but he decided he wanted to take matter into his own hands and run a non fud file on his botnet?
