Thread: [Warning - YouTube 301 - \[Beginners or Advanced\]](#)

DAFUQISTHISSHIT - August 13, 2014, 6:40 am

Right, so..

I know there's a huge majority of you out there using YouTube's instant ranking method: the 301 method.

I have to say the method is pathetic, people using it are pathetic and YouTube is pathetic for letting it go on for so long. Before anyone decides to rage and say "some people need the money!!!", hold your tongues and keep reading. Think about this for a second: Do you like earning \$2-\$10 a day using the 301 method? Is the amount of boring work you put into actually worth it? You may as well just go get a fucking job.

To me, it seems you have to be pretty simple minded to go and spend all your days going about with this method. You are plain and simply wasting your time. I honestly don't give a rats ass who I make angry by this post.. what I'm saying is true. Take this as a warning and stop wasting all your time earning a penny a day for hours of work.

I see that the 301 method is going on and off lately.. YouTube is about to patch this method. Take your hands out your pants, start researching and get working on real Internet Marketing. Anyone can do it, no excuses.

BlueShiftXD - August 13, 2014, 6:45 am

All these people using this method since the beginning could have learned how to rank in Google in the same time frame. Now your method is gone, what are they going to do? They're all starting from nothing, again.

Exactly! Their loss I guess! ?

Just saying in the right niche you really can make 100+ a day on youtube alone.

Nobody here is saying that YouTube is a bad medium for promotion. Using the 301 method is.

Read what Blueshift posted above.. In the time space of 6 months when youtube brought out the 301 method, I learnt SEO.. earned \$0 a day for those months, now im to 500+ a day.

What is more worth it? Yes sure youtube is a good source of income. However not vis the 301 method

SnowreyHS - August 13, 2014, 7:09 am

Lol, Youtube didn't bring the 301 method, but they let it be till now. Dunno if they will patch it, but if they do yeey :D

SIM-611976 - August 13, 2014, 7:59 am

Do the following:

1. upload a video, 301 rank it, make sure its rank 1
2. put a bit.ly [WARNING: potentially infected] or any stats tracking link on your video in description

And now it comes:

You'll notice how you maybe get like 10 clicks a hour, and that is just nothing.

People should actually track the traffic which is provided by that, it's close to be nothing, I alrdy get more from one reddit post

Sorry, bad choice of words haha. Youtube didnt bring it:p

Hope they do really soon.

Glad people are understanding my point.

Reddit is great for traffic, i get some of mine from there :)

I totally agree with you man...

This f*ckin' 301 method ruined monetizing on youtube :|. The time you put in making videos/uploading again and againd doesn't worth those 2-5 pennies you get.

Personally, when I first found about this method, I was surprised and tried it too. I was not too good at it, as I was used to rank my niches slow and good, or at least not by unlisted method :) Didn't make too much compared to a normally well ranked niche so now here I am talking about that wasted time.

In my opinion, people will never understand this until the method will be patched. And there are several reasons for that, i'm not going to list them here, you already know them...

Have a nice day and hope "Unlisted Method" will be patched soon!

Funtage - August 13, 2014, 9:52 am

In my opinion it's all about finding a comfortable balance between short and long term methods and where you'd like to see yourself in say a years time.

If you're happy to make \$XX daily/weekly using short-term methods (like this), then so be it. But just realise like OP has pointed out - eventually your income is going to shrivel, and when it does, those who put the time in to learn something that may be considered more complex in nature, will prevail and will be passing you in the fast lane of Internet Marketing.

Glad you understand my point.

Its a massive waste of time and youth (most people doing this are young.. 15-20) Use your time to learn something long term so it can actually be of use SOMETIME later in life.

tobi7400 - August 13, 2014, 12:07 pm

I don't understand how it is so hard to patch it. They should have an automatic ban system so when users use the same ip more than 50 times, the video will be instantly banned.

That's not even a solution most of them are using that tubebox program and using proxies with it.

The problem doesnt rest in using the same ip 50 times.. they cant do that because some uses that are popular on youtube upload hourly (i cant remember who, but ive seen some vids)

The problem is that it became part of youtubes ranking factor.. it was probably a side effect of some viral experimentation youtube was doing. So it was hard to patch because it was probably to do with yt's entire ranking system

Fyi.. If you know how to play with 301 you can make a lot of money without uploading videos everyday. I myself uses the 301 and push it to the limit.

Code [http://oi60.\[censored\].com/2u9q2kx.jpg](http://oi60.[censored].com/2u9q2kx.jpg) Aug 10 -11 are the 301, Aug 12 onwards when unlisted 301 has gone but still got my video stuck on that position.

You're missing my point ;)

Let me ask, what do you define "a lot" ?

Spending 6 months studying something that will last long term, while earning \$0 is 100x more valuable than learning a method that will last a few months then be gone.. you have nothing to show other than \$20-\$30 a day.. ok well done, have to admt.. thats good for the 301 method.

However, now what will happen when your video is flagged down? You dont know youtubes ranking strategy, you dont know seo, all you know is 301.. how far will that get you? ;)

Personally in 7 months I learnt seo and am now a few months from opening my own seo company. I have something to show..

Forget 301 totaly and do something that is long term bro :) Hope you understand my point now ?

Aur3xis - August 15, 2014, 6:28 pm

i would say, R.I.P 301 and WB SEO! :)

Months upon months of the 301 Unlist methodhave passed.. now the method is being patched.

What did people learn from doing it? NOTHING. What did everyone else learn? Not to waste your time and learn SEO or better strategies to make a living online.

Once the method is completely gone, people will leave the game, and it will be back to us, the original people who could actually do it properly!

? You got that right man!

SEO isnt easy though and if youre lazy, you will never learn it

lucky. - August 16, 2014, 4:29 pm

I tried this and made a few dollars, not worth it even though it was relatively fast and easy. With a HQ video ranked well I could make much more daily, and have before. I'm actually hoping for the patch to come so that it will take the easy temporary ranking out of the competition.

EnhancedMobi - August 17, 2014, 9:57 pm

wait wait. so is the method patched now?

A lot means \$1k+/day on 30 vids only and my videos aren't flagged down easily coz im not on the gaming niche. Some guys who are using 301+ are folks that are doing PPI/PPD making \$10-\$20 only per day. Youtube is huge goldmine!! Keep on testing some other ways to monetize your traffic. Here's a product of 301+ <http://prntscr.com/4dylsm>

I'm new to cpa/im so I'm not sure what this method is 100% and I know this is an old post but seriously, sounds like it could of been scripted.
