Note:

For those Who are more advanced in coding i HIGHLY recommend you don't look at the source as you will not like like it! Sorry.

It's a nice gesture you trying to give this to the community I admit that. But the GUI looks terrible. Thanks though.

Did anyone actually try this and see if its legit..? I want it for the skype spammer and I'm not trying to get a RAT so Aura has to help me get rid of it.
