Thanks for the share, going to do this in a bit. Looks legit. Btw, you should change the title to '\$2 8gb kingston micro sd card' since it is not actually free.

It's quite a nice deal. I just ordered the 16 GB card as it costs only \$3 more. Had to pay \$5 including shipping.

This is awesome, paid 4 bucks for 2 of them. Great deal. Better get them fast boys, there's only 8 left. Could easily buy those and resell :P

Where do I find the 16 gb card? I was going to look for more stuff to possibly multi-account with but all I could find was clothing????

Seems like they raised the prices =S

I found this 64GB flash drive, it seems to be the cheapest and smallest, too;

\$20 + \$4 shipping, with \$10 off its only \$14 seems like a steal for 64GB.
