Enhance Views Power Watcher Zero

Well... I don't know where to start off actually. So I'll first talk about why I made this.

I made this application because I find that the official app was a terrible. It uses too much bandwidth, you can't have it working overnight at times because timer is stuck at 0, and many more problems that I was facing, so I made my own!

My Power Watcher is fast, doesn't load videos or huge filed images, multiple can be opened, and a bunch of awesome and cool stuff! Let me highlight some of them :

1 - YouTube Account Provided - If you don't have a YouTube account, one is provided to you for free. The account placed in server will be changed often, so you could get more credits than originally. Of course, you can use your own if you want.

2 - Auto Restart - If there is something wrong, say a script stops working, the application will restart in a few minutes so you can keep earning throughout the whole process of boosting your credits.

3 - Cool-down Mode Halved - Cool down takes 300 seconds until it can start all over again and work, but that isn't true, it's approximately 150 seconds, so I programmed it to continue getting credits when the timer hits 130.

I recommend using 3 Power Watchers on each YouTube account, if not, cooling down will take effect, so you can avoid that 170 seconds of waiting.

Download URL (Update link for app as well):

If you've downloaded this app, please redownload it! There was an update error on version 2.0!
