Thread: [Crypter ntutorial needed](#)

Motojojo - August 14, 2014, 1:28 am

Hello,

Does anyone here have an tutorial on how to make an file crypter in Visual basic?
In english preferbably.

I'm learning VB and I just finished my simple RAT, now trying to crypt it and eventually want to bind it to an picture file so it's FUD and easy to spread :)

If you've an crypter or file bidner you made yourself I can give you my RAT soruce in exchange, it's not that great, but it inhcludes

- remote desktop
- FTP/SMTP support
- screenshot taker
- fuck with their speakers
- has an batch/vb executing program
- it uses inverted connection, so they can't really backtrace you so easy and can't steal your FTP/SMTP login credentials
- password stealer

Thanks already folks!

OT: Perhaps an File binder tutorial would be nice too.

A wise man once said "if you develop your own RAT, and have to crypt it, that is one fine piece of cypypasta"

RKYDA - August 14, 2014, 1:56 am

You have made a R.A.T but you dont know how crypt your file? I will tell you the best method for you.

Making it more FUD is beter, since I want to test it on virustotal and so on ;)

This post made me facepalm in so many ways.

What I was implying that IF you wrote all the code yourself, and did not copy paste it, there shouldn't be any detections.

There is no such thing as "more FUD" - either it's FUD, or it is not.

Virustotal distributes samples to antivirus companies, so if you have a FUD executable... it will get detected after scanning it on VT.

Motojojo - August 14, 2014, 2:07 am

Yes, but think of it that if your RAT gets detected with the crypter on it? re-crypt and done, what if your RAT gets detected when it's not crypter? rewrite code? Or does it works different, if so explain please :)

That is wrong. There are generic ways of writing some stuff, e.g a keylogger, hence you get the detections. If you're writing a huge RAT project, I'm pretty sure the last thing you want to spend time at is make it FUD.

You smell that? *sniff*.. Smells like bullshit to me.
