You are using Matthf.net api's you basically didn't code anything just lay api's around the program.
Don't download this it is a waste. A bunch of free api's learn how to code in Visual Basic (facepalm)

Pretty much every function from abrasivecraft lol

EDIT: Yup..

```
Code Private Sub nsButton1_Click(ByVal sender As Object, ByVal e As EventArgs)
    Dim str1 As String = New
System.Net.WebClient().DownloadString("http://www.abrasivecraft.com/api.php?cmd=10&username
=" & Me.nsTextBox1)
    Me.nsTextBox2.Text = str1
End Sub
```
