Thread: [Need a gfx for my pc, \(Specs of pc included so new gfx card is compatable\)](#)

**Sennheiser** - August 14, 2014, 9:47 pm

PC Info: <http://pastebin.com/mKXXW7kv>

if anyone can link me to a good compatable card for my pc it would be great.

Im not looking for a super expensive card to max crysis 3 with photorealism

but the card should be able to max black ops 2 for sure

when i upgrade the ram

**drugs** - August 15, 2014, 12:27 am

Why are you even worried about a GPU right now? That should be the least of your worries. Your entire PC needs to be revamped, otherwise, it would bottleneck the GPU. Your PC is a decade old...Can you even run CS 1.6 without lagging?

**The l33t hax0r** - August 15, 2014, 9:08 am

Uh... You sorta need to upgrade your PC first. What is your budget?

**CyBEr\_JeDi** - August 15, 2014, 9:19 am

HIS HD 4670 IceQ Native HDMI 1GB (128bit) DDR3 AGP

<http://www.hisdigital.com/un/product2-448.shtml>

Even has HDMI !!

**Xycon** - August 15, 2014, 9:28 am

Not worth it.

The guy simply needs a total new system. And while you are at that, you might as well get an better GPU then that.

**theChive** - August 15, 2014, 9:36 am

Haha max BO2 on it...good luck bud.

**unSatisfied** - August 15, 2014, 12:30 pm

You need to buy a whole new PC. 2 GB of ram, terrible CPU, everything is bad.

**You Just Got Sarged** - August 15, 2014, 12:31 pm

This "thing" is worst than my home server. I have an Atom 330 that is more powerful.

**Sennheiser** - August 15, 2014, 2:58 pm

Haha this is fucking great.

Pc is old lol

**You Just Got Sarged** - August 15, 2014, 3:01 pm

I would build a \$300 computer if I were you. It will surpass this build in every way. If you have that budget let us know.

What will a \$400 budget get me?

Make a build?

You can add a aftermarket heatsink which will allow you to overclock higher:

I like this. Could spend some more and get a 7200RPM 1TB HDD.

**You Just Got Sarged** - August 15, 2014, 4:52 pm

ops I selected the wrong one, but 1tb will cost more if it is a good one. (Not some samsung/seagate crap)

None the less I fixed it:
