Setup WAF and setup advanced rule-sets for layer 7 protection.

Bought OVH-VAC Dedi and configured

Once the DNS changes are made the site and API will be available again!

F.A.Q

Spoiler ([Click to View](#))

We get 18,000 resolves per day or more

Quote:How are we able to handle this demand?

We run from an OVH Dedicated Server, and we host our own Stub Resolver.

Quote:Can I purchase an API for my website?

You can, contact us on skype

Quote:How fast are the resolves on the API?

Depends on how many resolves are running currently, but generally around 400-900ms max.

Quote:I keep getting the same IP when I resolve (multiple times) and I know he/she just changed IPs!

We use a 120 username Cache system to keep the stub from using too many resources, give it a few minutes and re-resolve.

Quote:I just got a page stating I am banned?

Could be that your ISP is not supported, Proxies, web-proxy, Tor, some VPNs and more get blocked. Sorry, we're trying to keep bots out.

Hm, weird.

Send me your IP via PM and I will check all my logs to find out what the heck is going on.

Any IP will work as I can collect all your IPs via the CPUID hash created when you were redirected to the ban page.

Changed credit buying to 5,000 at a time for \$3.95

API cost increased from \$15 to \$50 - There are only three providers on the internet for API, and only 2 are Beta, including myself. - Losing profits, therefore - I have increased the base cost but dramatically reduced credit prices.

You are not banned, you are redirected.

Simply whitelist the domain, there are 0 ads on the site. It's to protect the javascript on the page.

Our API prices have dropped to \$5 instead of \$50, if you are interested PM me!

Works okay, look likes shit, leaked source and over priced but apart from that the function is okay.

BigDap - November 2, 2014, 12:43 am

Everything is back up and running except for the Username search and phone dox

Resolving and IP2skype however are running perfect.

Update: I fixed ip2skype's error.

BigDap - November 4, 2014, 11:27 pm

All resolving issues have been fixed again-enjoy

Awesome Skype Resolver Man !
+ BlackList :)

A n g e l - November 5, 2014, 5:40 am

looking good man, will be using this one for sure, thanks! ?

Big vouch!

All the tools are amazing. Hfresolver uses their own servers

Goodluck with the api sales

Krew - November 6, 2014, 4:44 am

Hi,

I have contacted you on Skype regarding this, sexy.

A4NaTo - November 13, 2014, 5:53 am

Yo Thanks <33 i searched so long for a nice fck resolver :D

BigDap - November 22, 2014, 1:08 pm

Giving away free blacklists for life: <https://hackforums.net/showthread.php?tid=4549543>

Thread rating is now number 5/5!

More people continue to come as we improve our services.

We will be grabbing another stub this coming month to improve accuracy, speed for our international friends and ms.

BigDap - July 11, 2015, 7:26 am

We are for sale!

Site has been down for a long time, due to me being very busy in life.

New thread!

This project is going to come back pretty soon, so look for that.

Will not be offering blacklisting services to anyone.

Will be selling APIs only to domains, not resolvers.

Will not be selling Private APIs.

Look forward to this coming back, it was the greatest skype resolver online, and it will be again.
:)

Looks great, I'll give it a try sometime.

BigDap - *August 3, 2016, 3:58 am*

Damn, this was a great project

Too bad skype fux'd it.
