Don B - January 28, 2015, 12:26 am

I have this ardamax 4.3.4 version, registered already, but i am not able to view my logs, the logs do not come in even in email and ftp files, only test logs came in, what should i do about this and i have contacted their support email but no response yet on this, is there anything i can do about this?

m4gnum - February 26, 2015, 8:46 am

The serials dont work for me. I get a message "Your license key is not valid for this version. Would you like to upgrade it with 50% discount?". I would be grateful for a new one.

aldypalypso - February 26, 2015, 2:31 pm

Use this serial instead: 16TC-2G1M-0I3C-EH4V

You don't need any username for this one.

Rabindra kumar yadav - February 27, 2015, 6:04 pm

What is the use of it because when u give the register no and id It will stop giving Email so It no use of It...If there is any reply for this please.
