I ran your exe on the bots before I went to mcdonalds. You had me test your first exe, which you said worked fine. Then you had me run a different exe on all the bots.

I bet you if you try testing the exe you had me run on the bots (2nd exe you sent me) that it's just a problem with the 2nd exe.

Fuck yo hamburgler. I tested with the 2nd one and it does indeed work. If you want to run it again i have no problem closing this down. i rally hope you are not scamming.

::user is trying to get it resolved now. looks like it could have been something weird after all (i hope)
