If you need c# class library then user ??D (

<https://hackforums.net/member.php?action=profile&uid=453908>) has made it for others to use.

Download it from below link...

Note -

1) This is my Sixth Theme... written while learning so it may have bugs...

2) Theme is coded without Themebase...

3) Constructive Criticism & Suggestions are always welcome...

4) Please leave comments for encouragement... ;)

5) Will add more controls if you find it useful & need arises... ;)

6) Credits to "Aeonhack" for Roundrect function...

7) Credits to "Mephobia" for NoiseBrush Function...

8) AlertBox Control idea taken from "iSynthesis" Flat UI theme

I must agree with Suicide Silence, you have improved, i'm glad you gave gdi another go, and i think

your getting better!

Bcoder - August 16, 2014, 4:07 pm

ooh nice theme i will try it now, thanks a lot !

CottleSilver - August 17, 2014, 12:02 am

Great job, keep working I would like to see what your 10th theme looks like if this is just you 6th

Sorry, I got really busy a few days ago. Surprise visit to my mother's side:

OT: This is an improvement from the last few themes you've made. The BG is a bit too strong though. Try lowering the contrast.

With low contrast it was not looking good... so i used these colours... May be i am wrong in choosing colours... ;) But still waiting for your theme...

But yeah, you don't have to lower to contrast too far. Have you tried cropping a square section of the original BG texture? It's look more like the original that way.

No didn't cropped anything... use noisebrush function written by Mephobia to create texture to avoid time & experimenting... ;)

Now planning to create new theme based on this...
