SqigglyLines made a thread claiming that he was selling 15m OSGP and was only looking for WU (the thread has since been deleted?). I pm'ed him offering to buy for 2.80/m, and he agreed on that price. He must've realized that I was a bit hesitant due to all the scam reports he had open so he offered to do small increments. We agreed that I would send him \$7.40 through WU for 3m OSGP. Since sending him the transaction details he has ignored my pm's.

Though it's not a huge sum of money, it still sucks to be scammed and hopefully my mistake will help others not to be scammed by this member.

Make the link an imgur, so it doesn't get censored out, what did you pay with? You can always just charge back, if it was PayPal.

Yeah I fixed the images. Payment was sent through Western Union, which is not refundable.

Woah would blur out his info to, that could get you in trouble, so have you PM'd him since? you need to show more proof of stuff that's going on xD, not much to go off of here.

Alright I'll blur out his info too. And I'll upload screenies of pm's to him. I sent him a pm saying that I would post this thread if I didn't get my money and that has been ignored as well.

Yeah I should've known better lol.

I got to blame staff for this. 1 less person could of been scammed if they banned him already.
