Looks decent for your first design. I would change your background a bit, maybe make it darker with a different texture.

When I make the next one I will definitely try to! Thanks for the feedback :D

I enjoy the simplicity although I personally would have the background give more texture and depth to the picture.

It looks good. But maybe you should work on the text part.. like resize it to make it fit into the design.

But cool first work dude :)

Considering it's your first attempt, I'll say it's well... okay.

There's lots to improve on such as the textures of it, the shading and whatnot, the text choices and so forth. Other than that, it's alright. Spend some time watching tutorials and reading some guides and you'll get the hang of it my friend!
