Thread: [I'm unable to update my avatar | Video included](#)

Nevieth - August 19, 2014, 9:52 pm

Hey guys, I've been trying to update my avatar for a bit now, and have found Hackforums hates me... because whenever I go to update my avatar it merely goes to an older image I no longer have on my computer, just with the resolution of the image I'm trying to change to.

I've done a video so people can see this image, sorry if my grammar is off, I'm writing this quickly, hopefully can get this resolved. I've attempted to clear my cache/ cookies, and still happens. I've completely deleted the image it keeps swapping to, so don't know what else I'm able to do.

Oh and encase anyone is curious, I'm quite aware my old email shows up on the video, I've swapped my email to a different more active one after I filmed this.

This sometimes happens to me as well. Just use a URL.

Alright I'll give it a shot, I was wondering if that was the issue but was extremely lazy and didn't want to upload it to a site if I didn't need to. ?

JoshAllen - August 19, 2014, 10:29 pm

Try to upload the image to a image hosting site like [Minus](#) or [Imgur](#) then put it in the Avatar URL box.

Let me know if that fixes your problem.

Edit: I hate while I am typing the reply someone posts my answer, lol.

Nevieth - August 19, 2014, 10:34 pm

Haha thanks guys, so far it's seems to have fixed the issue. I've compiled a list of like 30 different avatars that I'm going to deciding from over the next week or so.

Again, thanks everyone.
