Looks great, really, but the flat style is starting to get overused. Still ?

Great release! ?

Very sleek & even though a lot of people use the "Flat UI" this seems to really stand out with it's color way.

Silent ? - August 20, 2014, 10:25 am

Nervo - August 20, 2014, 10:51 am

I have not tried it yet man but i am sure this is a really cool theme! Well done ?

nathan72389 - August 21, 2014, 5:18 am

so all you did was change one color to another?

it seems like someone should just rip one of these and make a theme where you can change the color property.

.... death to all flat themes!

oh, before i forget....

I dont like it. it reminds me of some silly win 3.1 style color scheme.
bonus points if some one can get me a ss of that.

DOSH - August 21, 2014, 2:55 pm

I've tradded adding themes to VS 2017 for .NET but it doesn't seem to work. I reference the theme module and the toolbar doesn't change. Does anyone know why?

The link isn't dead and the OP isn't banned, I wouldn't consider this grave digging as the thread is a release and is viable.

User must be finding some useful theme for this project, though,
