Thread: [Database Lookup Source + Database Organizer Tool | BTC IPN | Flat UI | Free](#)

Kasual™ - August 20, 2014, 2:46 pm

Hey guys.

I saw Intel-Hosting Database lookup source, and I thought it was a great idea, but it looked awful and some of the functionality of it wasn't great. So I re-themed it and fixed some things that needed fixed and now I am releasing it. I did not make the original source.

What exactly does this thing do ?,and nice theme

ManDoR - August 20, 2014, 4:00 pm

The problem is not the look of the code, but how it performs. With #, which currently has more than a billion of records, we managed to make the search pretty much instant.

That is what you should have been focusing on with this "source".

Knar. - August 20, 2014, 5:11 pm

According to the thread he just rethemed, not really sure why.

Did you make #? I've seen it around and it's a neat site.

Kasual™ - August 20, 2014, 5:23 pm

This source isn't designed for 300 million entry sized databases.

Cybele - August 20, 2014, 5:49 pm

The design is really good, but it lacks customization. Meaning, you must add other stuff like IPs etc manually.

Other than that, it looks good.

Kasual™ - August 20, 2014, 5:52 pm

Yeah, in reality its a simple source. It really shouldn't be used for profit.

ManDoR - August 21, 2014, 2:22 am

Agreed. The UI isn't perfect at all. I focused on the backend.

Yeah I would be, it's very fast. Good job, the site overall is very good.

As mentioned above the UI could use a few touch ups here and there.

jeroendj2 - January 6, 2015, 5:19 am

Put this in my ftp, but didnt show op the nice gui as on the screenshots

Just flat text :/

Doesnt have anything to do with the sql file i havent installed right?

Please, stop skidding. If you don't know how to even install a script as simple as this properly, you shouldn't operate a website like this to begin with.

Krew - January 6, 2015, 9:56 am

Cool. Downloaded this to test it out. Thanks, Op.

Lol? When i add these files to my site, import sql database edit db config it should work

So why shouldnt i operate a website then?

TyrusX - July 15, 2016, 6:16 am

I've tried downloading the src but it says the website is invalid, are you sure you uploaded this to github correctly?

citsejaM - July 15, 2016, 11:17 am

<https://github.com/HFMacMiller/DatabaseLookup>

Found this, :)

TyrusX - July 16, 2016, 4:58 am

Thank you finnaly I can download it! ?

Klantish - September 13, 2016, 10:14 am

The link doesnt work and there is no virus scan! :(

Sakuto - September 13, 2016, 1:53 pm

The thread is two years old, it's normal?

146918496 - September 13, 2016, 1:55 pm

The github link has been removed,

Would you be able to update/send members the source?

Thanks.

Edit: Nvm two years old.

Specs - September 15, 2016, 6:35 am

I know this is old & removed but any chance someone still has it lying around? I would like to take a look at how the bitcoin IPN is done.

Sakuto - September 15, 2016, 6:52 am
