Thread: [Ultimate Doxing - Ep. 1 - Pizza Doxing](#)

?Criminal - August 21, 2014, 1:46 am

If you thought ISP doxing was next generation think again.

So you must be wondering, what the fuck is pizza doxing?

Pizza doxing is the art of social engineering delivery records/orders of a customer at any given pizza store near them.

some pizza chains like pizzahut have online logins so you can check if one of your victims emails you pulled has a pizza hut account attached you can go to pizzahut.com, head over to the login page and type in their email and if a security question comes up it means your target has an account with them, for this tutorial im going to be using killerpops main email k*****9@gmail.com as it's the only email I can find in a real world scenario that has an account associated.

now we call up the local pizza hut and you say your a supervisor from another store and you were told to call by your district manager to obtain delivery records of a fraudster who was believed to buy pizza with a stolen credit card, using the email k*****9@gmail.com I was able to obtain an address located in arizona which is most likely his real info but I am not going to be placing private information in this thread.

I was tired of the people staining this sub section with garbage so I thought to drop a nice private method for once which I know is going to start being abused alot now but I don't really mind as it only comes in handy sometimes and you still need a piece of info to actually obtain the records so it's not as good as isp doxing but comes in handy if you only have a phone number or email on your target.

I wanted to rush out this tutorial which is why it's a bit on the messy side.

Remember this will make more use out of pizza companys then doing the boring pizza bombing tactic as now you can acquire some decent intel on the victim.

Grindle - August 21, 2014, 2:16 am

I work in a pizza place and I can't believe I didn't think of this :D Nice share, very much appreciated.

Your welcome, sad to say I wish we had more HQ members such as my self posting more useful content instead of useless cypypasta of the same tutorials over and over again.BTW hook me up with some pizza coupons I could go for a discounted 20 dollar big box dinner depending on what franchise your with :D.

Sweetie - August 21, 2014, 2:35 am

Damn I wish there was more HQ members like you that posts HQ tutorials like these.

I am honestly tired of all the cypypasta of the same tutorials over and over again.

Btw, @Grindle can you hook me up with some pizza coupons? I could go for a discounted 20 dollar

big box dinner, depending on what franchise your with. :D

+1 OP.

Cyrus - August 21, 2014, 2:48 am

I think you should atleast partly cover up the guys email, as this is considered Personal Data.

Agreed, even though you joined a year ago? and is still a powindah,
I thought this thread was gonna be about ordering pizza to someone you doxed.
?

?Criminal - August 21, 2014, 3:54 am

I censored out the email so no concerns can arise and also I haven't used HF much till recently.

Grindle - August 21, 2014, 4:17 am

I would maybeBlue, but sadly I'm based in the UK :P

logging*machine - August 21, 2014, 9:24 pm

Usually it's as easy as: "My pizza hasn't been delivered yet, here's my email: {email}"
Then you go on, and they'll ask you for the address you wanted it sent to, and say 'friends address' in the approx. location of the victim, and be like " where did you guys deliver it to" they'll most likely say it if you sound legit.

FlashXIII - August 22, 2014, 1:46 pm

Nice tutorial but doesn't this assume you know the guy's local pizza hut to call or am I missing something?

Gary - August 22, 2014, 1:48 pm

Its pretty obvious what the email was too be honest killerpop9@hotmail.com?

Why the fuck would you need their recent pizza orders. Why would you include that in a dox

you can get a address + phone number+ last 4 of credit card + email = more to the dox, you could jack a paypal with that info, and a lot more im sure.

EDIT: made it more clear

They delete order logs after some time you know.

And how would you ever know when they order a pizza.

Most families order pizza I'd say once every week or two, you don't need to know when they ordered the pizza as long as they have ordered a pizza, I doubt they delete logs, for legal purposes, if they did I bet they delete them after a couple months.

Im sure most of them don't actually.

I ordered a pizza every one or two weeks or so for a while and now i am overweight.

There is skinny families in the world.

Plus my local pizza hut deletes them after like 5 days o_O

location and payment information on them.

This is nothing I have tons of private crazy methods which im not releasing yet for the quite obvious reasons(Fag Enabling, Saturation, etc), most of them are too blackhat for HF as well.I my self am personally a gray hat so everything I do is grey area.

DotPSD - August 29, 2014, 4:11 pm

Very useful info, I know this would work because the pizza place we order from they ask for alot of personal info, just incase it's a prank which happens alot in my area.

Not sure what you mean, but considering your username is the local modder, a game modder(I assume) wouldn't understand the true emphasize of how potent this method is at gaining leads, I assume your not really into doxing.This tutorial is meant for someone who already is advanced in doxing and wants new methods.Also this was never big anyone who knew how to do this kept it on the down low or to them selves, just like all the other advanced shit so im confused as to why you think this was big in the year 2013.

I have alot more just never released them yet you start to critical think when you talk with private investigators and learn how they do things thats pretty much how methods like this get pioneered PI's do stuff like this daily.

This is a PI exclusive method most people did not know about this and was exclusively done by PI's to get leads on people it was pretty much private I don't know anyone who knew about this aside from a few people in my friend circle.

This wouldn't work on the Pizzeria that I work at since whenever someone calls telling us they're from another store, we have a Challenge and Ask in place to confirm it.

Probably because motherfuckers were using this method to get shit on people ;)

Theres multiple variations of this method but this is definitely done alot more now this specific methods aimed at the big pizza chains for smaller ones you wouldn't pose as a supervisor you'd pose as a surveyist for example you have to think outside the box because you wanna pose as a person who would really need the info.
