Thread: [8Ball Theme \[11 Controls\] \[Dark\] \[Updated\]](#)

Hawk HF - August 22, 2014, 11:01 am

I haven't released a theme in a while, and I noticed that many other users were going on a theme-releasing spree, so I figured I should join in.

I'm not going to give a big presentation on the theme and all of its features.
If you want it, its free. The link can be found at the bottom of this post.

Glad to see you release this theme, it was nice to have it private in some time.

But its just too nice, so it was needed to be shared.

PS, i am still glad for the other custom theme you made me, lets see how long that last private ?

Thanks. Professionalism is a goal that I usually keep in mind when designing themes.

I like the color selection even though it's as simple as gray, white, some blue and black.

However there is one thing i dislike about the theme abnormally much and that's the dark outline on the buttons and on the progress bar. I find it disturbingly ugly and I'm sorry to say this i don't know why. If no one other than me thinks the same it isn't necessary to even think about changing it because i don't generally use themes.

Very good work though :)
