Thread: [CRYPTER - ANTI AV EMULATION](#)

stdimap - August 22, 2014, 2:14 pm

fuck you guys, not appreciating this shit.

you guys are all fucking skids.

RKYDA - August 22, 2014, 3:42 pm

Guy... VB.NET section,

<http://pastebin.com/TTCQtJqT>

Usage : <http://pastebin.com/ZQq3j7hU>

Second party : <http://pastebin.com/ZhVqQQUT>

Regards,

Not everybody who views the thread is planning to use this, or is even interested in something like this at all.

I only viewed it because it was unread and I just wanted to check it out. I'm sure there are others who do the same as well. Maybe they viewed the thread and this isn't the type of thing they were looking for. Chill.

I'm sure majority of viewers are interested in this but have no clue how to use it.

Rule of thumb: If you don't have something constructive to say, or what you are about to post sounds stupid, don't post.

I don't bother on a lot of threads because of this sacred un-spoken rule. Also, what you said is pretty valid. I have literally no idea how what you posted works.

No no. I said people don't know how to use it.

Not that people don't know how it works. That's why i'm selling the source to the shellcode.

You know what, fuck you and fuck this forum. I'm not releasing this.

You know what, fuck you and fuck this forum. I'm not releasing this. Welcome to HF, take a cookie and a cup of tea to sitback and relax :)

Don't expect this to go viral like a youtube video after just 1 day

MrAccount - August 23, 2014, 12:49 am

I apologize but what is this non-sense about?
