How to DDoS

Sorry for my bad English, I dont know much about DDoS but I shared the things I know with you guys have fun ?

How to DDoS

to DDoS you need to build a website / person flat

It is best to have 1tje buy on the Internet

You can buy it best here:

<http://www.booter.io>

Free booter:

<http://www.booter.io/free>

How do I get someone offline?

You need someone's ip to DDoS him

How do I know someone's ip:

There are many ways. You can try an ip logger (usually that option in the stresser where you bought)

Also with the skype name you can see someone's ip

There are the following website for:

<http://www.resolve.me.org>

<http://www.mostwantedhf.info>

<http://www.fastgrab.biz>

(If someone is blacklisted on resolvers above

<http://www.skyperesolvers.weebly.com>)

If you have a booter:

Host is the IP of the person

Port is website and people always 80

In minecraft servers is 25565 unless the port has not Customized

Attack methods

There are five main attack methods (there are many more)

- UDP
- SLOW LORIS
- SSYN
- DNS
- Pingback

UDP: Use for people to get offline

SLOW LORIS: Allows you to websites with hitte'n

SSYN: For servers (like mc servres)

DNS: For websites

PING BACK: After slow loris the best way to get a website offline

Thank you for reading good luck.

Keith Ape - August 22, 2014, 4:26 pm

Lol, thanks for the laugh OP!

I should be able to fall asleep today.

-X- - August 22, 2014, 4:28 pm

You should change the title to "How to use a Booter/Stresser...

Keith Ape - August 22, 2014, 4:35 pm

(Aug 22, 2014 04:28 PM)Master Bates Wrote: [\[CITE\]](#) You should change the title to "How to use a Booter/Stresser...

Or, "How to Be a Skid, and Act Like You're Giving Back to the Community"

Either way.

?

(Aug 22, 2014 04:28 PM)TriK3r Wrote: [\[CITE\]](#) THANKS!!! BRO ... this is sooo awesome and helpful ... nice one ...

Uhh - I can't tell if that was sarcasm or not.

?

Nootropic - August 22, 2014, 4:48 pm

This Thread is a joke or a very good sarcasm :D

But maybe helpful for some people.

Steff - August 23, 2014, 6:23 am

I already told you guys that I'm noob in hacking and I shared the things I know to teach other people who don't know this.

Don't make fun of my threat ;(

It would be cool if you guys could teach me something to

Nootropic - August 23, 2014, 8:46 am

If you have questions you can ask me. I will try to answer it.

Steff - August 23, 2014, 8:48 am

Ok, you got skype I got some few questions :3

Kouichi - August 23, 2014, 8:57 am

Makes me want to make a tutorial on "How to make a google account" lmao.

Steff - August 23, 2014, 11:00 am

If you know this then it doesn't mean that everyone knows this. Not everyone is good in hacking and the forum name is "Beginner Hacking" and I only shared this for people who don't know these things to help other noobs like me how to DDoS.
