Thread: [\[HTML\] Make one image fly all over the place](#)

joneh heil - August 22, 2014, 4:06 pm

I am trying to make a sort of troll website and I need one image to fly all over the place. Could anyone help me out?

Thank you.

Don't know anything about HTML, but, can't you just render an image at an x and y, and after every few milliseconds add 1 to the x or y?

Don't know anything about HTML, but..

```
Code <!DOCTYPE html>
<html>
<head>
  <style>
div {
  position:absolute;
  background-color:#abc;
  left:50px;
  width:90px;
  height:90px;
  margin:5px;
}
</style>
<script src="http://code.jquery.com/jquery-latest.js"></script>
</head>
<body>
  <button id="left">&laquo;</button> <button id="right">&raquo;</button>
<div class="block"></div>

<script>
$("#right").click(function(){
  $(".block").animate({"left": "+=50px"}, "slow");
});

$("#left").click(function(){
  $(".block").animate({"left": "-=50px"}, "slow");
});

</script>

</body>
</html>
```

Once again, don't know anything about HTML

You'd use a bit of javascript to do that. HTML on its own isn't designed for jazz. Don't use the piece of

jquery above. Go do a some basic reading on javascript and you'll be throwing dicks around your web page in no time.
