Thread: [#1 HQ RDP Shop | \\$2.50 Admin | Bulk Order | 1 Week Warranty | BTC/PP/PM](#)

AP0STL3 - August 23, 2014, 1:40 pm

-AP0STL3.INC RDP SHOP

I have been into cracking RDPs for a couple of years now, so you are assured that you will be getting the best RDP from me. These are cracked RDP in the first place, that's why they are very cheap as compared to VPS. These are mostly Window 2003 (70%) and Windows Server 2008 R2 / Window 7 (30%).

I will be doing random sales, and if you have any request, you can ask me and that will come with an extra fee. Be rest assured that i won't selling same rdps to 2 buyer i delete them from my stock after purchase .

The RDP specs range from 1GB-32GB of RAM, from a single core to 8 cores, and also from 1Mbps-10 Gbps port speed. These are good for CPA, Mining, Staying Anonymous, Survey Completion, Botting, and Ratting etc.

All the transactions will be carried out via PM or skype only. Post in this thread if you are interested.

My payment method for now will be BTC/LTC/PP/PM.

Payment:

Admin: \$2.50 with 1 week replacement warranty.

Non Admin: \$1.60 with 1 week replacement warranty.

Bulk order for non admin rdp: \$0.90= 10 and above AND \$1.50 Admin account 20 RDP above (limited stock hit me up fast before they all got booked down)

Note: Replacement is just a one time thing.

Terms of Service:

All the sales are final.

I have the right to deny selling to anyone.

If password gets changed, there will be no replacement.

Only browser you will be able to open and some stand-alone program but most programs require administrator right so you will be needing Admin rdp to do so .

I ran commands on the rdp and i was denied permission .. that is to say they were not admin .. only to even find out other people are using the same user rdp he sold for me .. this is absolute trash .. IF I can post the two rdps on his thread for every one to have access to it to be sure am not just making things ups .. I gave him enough time to resolve this .. but he didn't

Seriouslt tbh you are just a skid want to rip me off , you can go ahead and paste the rdp for the forum to check if it add rdp or not , also to the log you paste you sent me \$10 and i refuded \$5 since i don't have the other 2 rdps you asked for . So don't make it look like i took all your money and nothing in return so if you wanna sale trash kindly do you part well and always be honest.

Payment sent 8 hours ago and still waiting for account.

24 hours passed and still waiting. What's going on?

After 26-27 hours, OP gave me an rdp with some asian language, I guess chinese/japanese which I can't understand a bit. It's useless for me if I can't understand anything. I asked op to replace but he stopped replying. Still waiting for his reply or replacement.

Internet is also very terrible on this rdp. Can't even load a single website on firefox.

Just a warning to others

I bought an RDP with windows 7 and was in english for \$5 last night. this morning i work up and the rdp has some type of a password lock on it that was not the same as the rdp password so i asked

AP0STL3 for a replacement and he refused saying i could have just put the password locker on myself (really?) and he wont be giving me a replacement.

so i paid \$5 to have an rdp for less than a day with no replacement offered

SO then I tell him and he just instantly goes offline on skype less than halfway through the order...I check the other ones and one other is locked and I don't have admin so. Very very strange, can't really vouch anymore. I think he'll make it right so I'll edit this if that's the case. I have a hard time believing he'd run with ~\$10 lmao.

i haven't checked this thread before even completing your order, plus i lost internet and couldn't get back online in time and when i was back you were gone so how was that my fault? plus you paid me \$10 instead of \$13 kindly send my balance to my btc address cause you are ingrate and i see no reason why i will risk my reputation for \$10.00 that is stupidity to me .

I paid you \$12 worth at the time because you said it was \$1.20 each for country selected. Was just weird that one didn't work and then your internet dropped haha. It works now, they're all good, and maybe because you disconnected the BTC price dropped so you saw it as \$10 instead of \$12?
