Thread: [Crypting Service, 0/51 FUD. \(FREE SERVICE\)](#)

I'm offering a free crypt service at the moment. The only thing that you need to let me do is to bind my server to your.

Any settings can be used, I cannot crypt .net though.

PM me your skype/post it here and I'll add you! :)

It's not a good crypting service if your bind your server.

Was going to ask and get my stub crypted but when i saw that you wanted to put your server as well. I was like damn, that's a red flag.
