ShizzleFly - August 24, 2014, 2:56 am

Hi,

I'm not a pro photoshopper, thats why i ask it here.
I have a empty room so i want to have a poster (Big one!)
[160Cm width x 90Cm height) (Centimeters)

I need a good design for this. I have something in mind with "The quiter you become, the more you can hear" And needs to be a little 'hackers' like. With a cool design. Maby with some gaming in it.

If ur interested in this please PM or post it here.

Need more info? PM or post it here.

BTW, THIS IS A PAID REQUEST

Posters can look really terrible due to shine coming from the room light. And matte posters can be quite expensive. Have you considered one color mural? Even tho it takes time and frustration, you can see many tutorials online and the result will astonish anyone who visits your room. Posters look good only if they're framed and done in "three sheet" dimension. I'm telling you this from personal experience but at the very end it is your decision.

Peace
