Thread: [Guide For Ubuntu 10.04](#)

Verilog - May 25, 2010, 10:52 pm

Many people get scared by the name name Linux. and say its so complex....

NOPEs

.....

GUIDE FOR UBUNTU 10.04

1>So here is a guide hw to make it user friendly and easy to use..

Download OR Order free Cd from Ubuntu 10.04 website

Code <http://www.ubuntu.com/getubuntu/download2>>Use the installation..for simple installation use install inside windows..

Caution:I AM NOT RECOMENDING TO USE THIS AS ITS NOT SO FASTER,Reliable and has reduced performance than fresh copy.

ITS NOT THAT U R GOING TO MESS AROUND WITH INSTALL INSIDE WINDOWS

Just try it for once

3>After installation u will get to the first and very workspace of ubuntu.

FOR appearances u will go to Properties and add extra effects(includes wobble effect and zoom effect)

For compiz manager go to terminal and type

Code `sudo apt-get install compizconfig-settings-manager compiz-fusion-plugins-extra compiz-fusion-plugins-main compiz-plugins emerald`This will give u a large no of plugins for compiz and emerald theme manager.

JUST FOR THE SAKE OF BASIC TUTORIAL I AM NOT EXplaining COMPIZ configuration in this edition..

4>Now for the software part-->

Go to applications>ubuntu Software Center

there u can add vlc-Movies and multimedia player),

(Note that the ibuilt media player is also cool)

Cheese->for webcam(really cool piece)

Adobe pdf 9,Adobe flash player,

Avant Navigator bar(best dock bar ever present)

Gnomeip messenger(similar to windows) but much better as it also displays ip address of host nfo viewer-to view .nfo files

Chat client is EMPATHY -BEST client as it supports each and every chat cliet ever made....

U can also use PIDGIN and gtalk is also there

(plz note CHAT client Empathy can work for facebook,gtalk everything..)

U CAN ALSO GET INSTALLER FOR VARIOUS SOFTARES(.deb extension)

Like

PICASA-->Code <http://picasa.google.com/linux/thanks-deb.html>Adobe Reader from adobe.com and many more

Millions of application are there u can Install all u want

Rhythembox (inbult and u will love this music player)...

5>What abt antivirus????There is no need at all as ubuntu has 1-2 viruses made that too are rare and .exe file dont work

(NOTE-exept wine(BEST),crossover and

Cedega, which is more for games

play on linux, which is also for games

crossover which you need to pay for)

But if u want u can get Avast and bitdefender,(kaspersky in beta stages(Source:friend)
6>Games--Thousands of game available at the software center...but some of the best are
Quake3 (open arena),assault cube.

These are present at software center..there are many more but i tried 3 games only..

7>After reading this much u must hav thought what abt .exe file softwares???

So for that u will use a software WINE(will tell u more abt it in Guide 3)

But for basic u can install it by goin in terminal and writing-->

Code sudo get-apt install wine1.2SOONER i will be adding some screenshots and currently i m
facing xams

THANK ME IF U LIKE AND ALSO PRESS THE LITTLE Thank BUTTON ON THE LEFT
SEE YAA
?

tejasnmchavan - May 26, 2010, 6:32 am

Thanks

But next time use colors or text formatting....

It gets boring to read in plain text.

Cheers :D

Thanks fro ur reply bro..

i m really happy someone appreciated it

Astounding Pirate - May 26, 2010, 4:26 pm

Take a good look at your thread, it looks scarier than the shell of linux :P

tip for attracting nooblets: use pictures not words

Verilog - May 30, 2010, 10:41 am

Thank u bro i m happy u suggested something

N!ck - May 30, 2010, 3:01 pm

Despite all of the grammatical and spelling errors, this is a pretty good guide.

I will check out some of the software that you have recommended =D

Thanks mate...hope more people like this post

!anonymous - May 30, 2010, 9:19 pm

Find and replace every single instance of "u" with "you" and your guide will be 94 times better.

Have a good day :)

-Hyperion - May 30, 2010, 9:20 pm

good guide the the spelling atrocious

MarkW7 - May 30, 2010, 9:39 pm

Half decent guide, could do with a bit of a tidy up and formatting. Some useful info in there though. ?

thank u bro..

And for replacing u with you..i did it now is it looking good

Bro there is a problem ..i cant edit it... :(

Forex - June 2, 2010, 6:02 am

nice work dude

im getting this now hope it goes ok

[EPIC] LOL [/EPIC] - June 2, 2010, 7:01 am

The guide is a bit chaotic, I suggest you leave some lines blank etc.

Still a good guide.

Ill install 10.04 on my laptop asap :3

Verilog - June 3, 2010, 7:12 am

thanks blackstar and LOL

by the way can anyone tell me hw to edit post after some days becoause i will make it better now

Verilog - December 11, 2010, 9:45 pm

i was editing this post today but i dont get it why cant i edit it..should i make a new thread?

Cool_bhusi - December 12, 2010, 3:26 am

thanks dude its been superb graphics for me thanks again will u provide me some commands?

y2gxmod - December 12, 2010, 3:43 am

this is a very nice find . . .

i've been waiting for something serious but n00b friendly about ubuntu . . .

keep it up mate!

KBC - December 12, 2010, 5:18 am

Thanks for replin in my post..:)

FuryXXX - December 12, 2010, 11:10 am

couldn't really read it because of the bad formatting

KBC - December 12, 2010, 9:16 pm

this means i hav to make a new post..:(

but any suggestions on any new ubuntu tweaks??

Verilog - December 17, 2010, 9:12 am

Thanks for your replies..:)

a303 - *December 18, 2010, 2:54 am*

Good thread for new Ubuntu users! The presentation could have been better though.
