No, Actually the opposite! Almost impossible to crack.

Sales are open, contact me on aim: ItzMeltyNet

**?eumonic** - August 27, 2014, 9:26 am

I'd be careful in saying it's impossible to crack; almost nothing is. But GLWS regardless dude! This looks really good.

I've just read the title: "HWID Authing System", then it's crackable.

Regards,

Regards,

The way I designed this HWID system, is even if you try to crack it, its gonna be hard to do so.

**RKYDA** - August 27, 2014, 12:57 pm

Just send me a private message with the security i'm gonna to try.

Regards,

**Chickendipper** - August 27, 2014, 1:04 pm

If you send me a test application with your auth system, I'd like to see how uncrackable it is.

Dont sell your source if nobody can try the security

Regards,

Actually, OP removed the source sale so it's fine for now I guess.

**frank10** - August 27, 2014, 1:20 pm

I am selling the source and all files for the HWID, i'm selling it open source, so it can be altered by the owner, and used in other ways, but can be used for its original purpose too! It's not meant to be cracked, so don't try, unless you come across someone that has it in their source, but it's still gonna be hard to do. Thanks for all the feedback, don't wanna sound like a dick not giving a test app, but I want it all secured, the buyer can do what ever they want with it after they get the files :)
