gghitman - August 27, 2014, 8:34 am

Hello

sorry for translation i m french but
i will share 3 project for custom 3 control
parametizable in propertie

color border and size (Color or gradient)
color base (color or gradient)
color progress (color or gradient or texture)
round corner

color border and size (Color or gradient)
color base (color or gradient)
color progress (color or gradient or texture)
button type and color
round corner

color border and size (Color or gradient)
color base (color or gradient)
color progress (color or gradient or texture)
button type and color
round corner

blend not coded by me

im not a best coder
master go your way or modified source for learn beginner

For the love of God, I hope nobody ever uses those.

SaketSaket - August 27, 2014, 12:26 pm

Is this your first attempt? if yes then nice try... try to improve the way i am improving in GDI ;)

gghitman - August 27, 2014, 1:38 pm

thanks sacketsacket ?

yes its my first attempt

possibility multiple

image is exemple but i m bad for choose color ?

nuk - August 28, 2014, 6:20 am

Like stated above... not bad for a first try at all. You can always go online for a color scheme (which is what I do) to help you out with that. Try this: <http://paletton.com/> Good luck with future GDI coding :)
