Thread: [Experiencing issues with hackforums CSS](#)

szUser - August 27, 2014, 8:20 pm

This is how hackforums is being displayed for me

[img]http://i.minus.com/jbdECyRrZ3BVii.JPG[/img]

I'm not sure if it has to do with the dns or not.

SoulZeh - August 27, 2014, 8:23 pm

Clear browser cache and all that sort, you should be fine.

szUser - August 27, 2014, 8:23 pm

I'm trying it in incognito mode. I've tested it on my VM that was installed just now.

Canon - August 27, 2014, 8:25 pm

Clear cache, clear cookies, flush DNS. Should be fine.

szUser - August 27, 2014, 8:26 pm

(Aug 27, 2014 08:26 PM)szUser Wrote: [\[CITE\]](#) Did all that. I've tested it on a freshly installed VM. Do you get the same result on a different browser?

szUser - August 27, 2014, 10:03 pm

(Aug 27, 2014 09:29 PM)Curt. Wrote: [\[CITE\]](#) Do you get the same result on a different browser?It's just chrome. I'm using an addon for p2p proxy

This addon was working fine until today.

This website is fucking broken. It's blocking multiple canadian ISP'S it can't configure CSS properly, fucking god.

Omniscient - August 28, 2014, 12:04 am

When viewing source of the index page what is the url for the global.css?

Dam Son - August 28, 2014, 12:13 am

(Aug 28, 2014 12:04 AM)Omniscient Wrote: [\[CITE\]](#) When viewing source of the index page what is the url for the global.css?

Mine is

<https://hackforums.net:8080/cache/themes/theme5/global.css>

Here's what it looks like:
Spoiler [\(Click to View\)](#)

Not as bad OP's, but still missing some texture (doesn't look normal).

Oh btw, the logo is adblock'd (just in case nsfw).

Stealth V2 - August 28, 2014, 5:01 am

I had this problem earlier and had to clear my cache it seemed to worked.

Vanilja - August 28, 2014, 5:03 am

Got this in school today also.
Did work last time I tried.

Tedaron - August 28, 2014, 5:04 am

Had the same problem.

It's fixed now.

szUser - August 28, 2014, 9:50 am

(Aug 28, 2014 01:39 AM)Omniscient Wrote: [\[CITE\]](#) And does that load for you?
Mines the same link but it doesnt work so i try port 80 and it works just fine, when i go to port 8080 it just keeps recursively bringing me to the 503 checking your browser which would be the reason why my CSS doesn't format properly. But yet again i'm using an addon to connect to HF that was working before up until yesterday by the way you requested my ip address but i can't pm so i'll just post it in public. 209.107.109.62

This works for my addon: <https://hackforums.net/cache/themes/theme5/global.css>
This just keeps recursively loading 503:
<https://hackforums.net:8080/cache/themes/theme5/global.css>

Omniscient - August 28, 2014, 11:01 am

I've moved us back to the CDN. DNS should be good now.

szUser - August 28, 2014, 11:31 am

Perfect!

Also do you mind looking into that IP Address? I've also changed it numerous times to see if it was firewalled based on an ip range but no good results. I think it's the entire ISP
