Gangstahpy - August 29, 2014, 10:19 am

So in order to win this eBook you must do this:

1. Read the sales thread. You can decide through the thread if you want to join the contest or not.

Sales thread: <https://hackforums.net/showthread.php?tid=4402664>

2. Post a few sentences on why you think you deserve the eBook and why you should be the one to get it for free.

3. I will choose the user with the best answer and give the eBook away to that user for free, which will also include my full support..

For second place and third place I will offer you both the eBook at 90% off and 80% off with support. If 2nd and 3rd place winners do not want it, I will offer it to the next person.

EVERYONE ELSE that joined and did not win, if you really want the eBook I will offer it to you all at 50% off, with support. and at 66% off without. I have a sale going on at the price right now, but it will end soon.

Anyone that participated in this contest has the option to buy it at that price for as long as the eBook is for sale, whether it is at half price or full price.

Good Luck!

Well, your thread looks kind of odd, but the reviews and proofs look great.

I deserve the ebook because I have purchased a lot of ebooks on this forum and read a lot of ebooks as well. I have gotten shafted many times, and also found a few successful ebooks. I know what methods are good and bad, and I know what it means to have a well written book. I would be able to give you a fair review and show people whether the ebook works or not as well.

I also think I deserve this because I could honestly use some new ways to make money, your method looks very interesting and I am honestly intrigued. I would love to have the chance to use your method and profit.

Thanks.

Hey, I think I deserve this ebook because instead of upgrading I spent 60\$ on ebooks and none of them worked. I know it's a short answer but it's the truth.

Thanks for hosting this contest.

I don't think I actually deserve the book more than anyone else here, we are all trying to earn something online after all :D But I'm saving money for my college after this year, my driving license, car and any kind of income would be very helpful. I've bought many, I mean really many books on HF and from all of them only 1 worked. Half of them offered a "refund", but once you want it they just keep delaying, after buying a book I actually spent even more than actually getting something. I've always tried the method for at least a week before I give up on it, but none of the books work. Anyway, you seem very confident about your book and that makes me believe it's going to work and that you're serious. Well, that's it I guess.

Good luck to everybody and thanks for doing this contest OP :)

I'd really enjoy a copy of this book because I have the ambition to use it successfully without claiming its too hard or any shit like that. I've been out of school for a couple of years now, cant find a job in my rural town and have twins on the way, legit. If you can help me earn I'd be more than happy to shout your name from the mountain tops, good luck to everyone involved.

I will invest money if needed in this method plus will give my full time, to earn as much as i can and will tell other people too to get this ebook.

The most important is that will give my video review(i think this will be best thing for this ebook) if i earn some profitable money from this.
