Thread: [\[help\] how to hide a key logger in a picture?](#)

Rj1122 - August 30, 2014, 1:02 pm

Hey, um. i have a key logger, now i just need help on how to hide it in a picture, like when they open the picture it auto starts the program. any help?

agy110 - August 30, 2014, 1:58 pm

You can't.

Use spoofer and binder is best.

Juggernauten - August 30, 2014, 1:59 pm

Find an exploit for the most common picture viewer and use it.

basix - August 30, 2014, 2:11 pm

merci sa tue :) merci beaucoup c super sympaa !!!!

Use spoofer and binder is best.

Do this, and also use an icon changer to change the icon to a .jpg preview icon

Edit: heres the jpg icon I use <https://www.mediafire.com/?4qubuyscos4cbe1>

Bulbasaurz - September 4, 2014, 3:38 pm

An image doesnt have exacutable space, so you cant as its been stated. You can however bind it to a executable archive file (just say is a set of images :D), or use a JDB. I wouldn't spoof the extension, Avast and a couple other AV companies are now flagging it. So even if it shows up FUD they may flag it.

dumpsking - September 5, 2014, 11:37 am

Could you hide the exploit in a zip file?

Lil D AKA Stem Cells - September 5, 2014, 12:41 pm

If you use bind the picture to file, then change the extension to .scr. If you spoof the extension, there is a good chance that you will corrupt the server.

OMGNEEDSLEEP - September 6, 2014, 7:21 am

Why do people even use icon changer, most servers reset them as their originally file extension.

Best way to do it, is to change the file extension to .pif/scr or something like that, to make it more legit.
