Thanks for the great vouch Cathal! :)

Peppermint Butler - August 31, 2014, 1:57 pm

I would not hesitate to deal with this user!
He is extremely intelligent and very easy to work with,
He had made both the programs I currently sell MineBot and YouSpread.
Which are both expertly crafted just the way I wanted!

There is no limit to what he is capable of,
Plus he will surely finish anything you request in a very timely manner!

Thx a lot Narwhal!

MELLOW - August 31, 2014, 1:59 pm

Sure! I have taken Computer Science 1 & 2 over the summer at my local community college (while still in high school, crazy right?). Data structures, recursion, sorting and searching algorithms are all still fresh in my brain, feel free to message me on Skype I'd love to assist!

(Aug 31, 2014 08:44 PM)Lord Pankake Wrote: [\[CITE\]](#) Vouch for Narwhal!, just needs to alias his thread. Great guy from what I've seen from him!
Haha, thank you for the vouch Lord Pankake!

~Tom~ - September 1, 2014, 8:26 pm

I honestly don't know what to think of this guy, he refuses to accept paypal from me because of the rep Omni left me even though I provided numerous examples of why I'm trusted and even asked him to do down payments of which I would pay him \$50 (PayPal) before he even started coding and he declined. He want Bitcoin only. I wouldn't recommend dealing with this guy!

boost - September 1, 2014, 8:32 pm

Thanks boo5t! Glad to hear a single person confirm member is not a scammer. Unfortunate I had to require BTC only due to the open scam reports on him and the negative reputation from the forum owner.

Why are you ranting about him wanting btc instead of Paypal?

If he had reason believe your not trusted then that's for him to decide.

That doesn't take apart from his quality of service, I only use Narwhal for when I need something coded.

And yes the first couple of transactions he had me use btc, but then after a while we did our transactions through paypal.

Now you're having your little buds neg him?

Not very professional at all, from my point of view I think there was a good reason he didn't deal with you.

~Tom~ - September 1, 2014, 8:39 pm

When did I say anything about the quality of the service, you should learn to read. I said I wouldn't recommend dealing with this user because of the way he acts which makes him seem "sketchy". I

had no one neg him, feel free to leave your opinion [here](#). I would have been very professional about this deal however narwhal didn't seem to have the same attitude.

"Sketchy" shouldn't be the term used.

He declined offering HIS service to you because he thought you were sketchy due to reputation, which is a valid reason.

(Sep 21, 2014 12:46 AM)Hammered Wrote: [\[CITE\]](#) Mate are you willing to use a middleman for them to hold the funds?

Ofc! I offered to use one with him and he told me not to waste his time :/ sounded very phishy to me

MELLOW - September 21, 2014, 12:42 pm

(Sep 21, 2014 12:21 PM)Royal ! Wrote: [\[CITE\]](#) Me making a fuss of this?. I did nothing. When he didn't deal with me we went away. After some time, it was HE who messaged me again over skype to send him money. I didn't messaged him, he it was who did. And again it was Him who repped me first. I didn't. And I am not going to pay ANYONE such amounts at first and that too in BTC. When I told him the terms of deal even before he started coding, why would he agree on that point then?. He could've said NO, that simple.

Okay... I'll just leave the auction up man, theres no need to get upset if you don't want to be reasonable and use a middleman. If you want the project, fine have it, otherwise another user will buy it and life goes on... have a nice day ?

Projects people ordered but flaked on (for sale):

- Tube Monetize (slave monetization software via YT ad's)
- Dynamic Survey Locker (works with surveys and adfly)
- Skype Name Checker (checks availability)

If anyone is interested please add my Skype @ pvm__narwhale shame to have spent all this time for no one to get use out of them!

Redwall - September 23, 2014, 5:58 pm

I'm sorry Putin! I do offer C++ but I don't consider my ability to manipulate the language is as high as it is with others. My C++ knowledge currently reaches to the point of Windows API interfacing but I have yet to explore manual garbage collection with the language :P

Malaxus - October 5, 2014, 10:13 pm

What type of programming language(s) will get you to the point in which you can create an OS for example?

Or other advanced softwares?

MELLOW - October 5, 2014, 10:23 pm

(Oct 5, 2014 10:13 PM)Malaxus Wrote: [\[CITE\]](#) xD

What type of programming language(s) will get you to the point in which you can create an OS for example?

Or other advanced softwares?

Well,

I made a simple OS that functions as a command line calculator with C (based on linux kernel 2.3) but there is really no need to reinvent the wheel, most popular OS's are coded in some C variant. The other languages I've listed are much higher level programming languages to be run on top of a lower level language directly interfacing hardware, such as C

Malaxus - October 6, 2014, 6:45 am

(Oct 6, 2014 06:45 AM)Malaxus Wrote: [\[CITE\]](#) What language is best for creating an advanced software?

Define "advanced software"

Easy to create => C#

Performance => C++

Malaxus - October 10, 2014, 2:05 pm

(Oct 10, 2014 12:19 PM)MELLOW Wrote: [\[CITE\]](#) Define "advanced software"
