Why you want 143VPN: I would like 143 VPN because my previous VPN expired, and because 143 VPN is a VPN that I would actually purchase.

What you will use it for: Mostly, to be safe when speaking with people I do not know.

Why is anonymity important: Anonymity is important because it allows you to be free. If you are not anonymous, it constricts your ability to tell the truth, and how you really feel about something. With privacy and anonymity, you can say what you would normally never say in real life.

Why you want 143VPN: To make a brand new identity and get rid of any foot prints that I have on the web also it would help from people trying to DDoS me on xbox and through skype.

What you will use it for: To make my new identity and help get rid of my old identity also to help and be more confident talking to people I do not know, I can also bridge my xbox connection through my pc so people can not grab my IP through xbox and DDoS me.

Why is anonymity important: Anonymity is important because people could be a ghost to anyone who is trying to get some sensitive info on them and could help them be a lot more secure on the internet.

Thank you in advance for hosting this contest ?

Why you want 143VPN: To keep my information safe from others.

What you will use it for: I will use it to do my regular browsing and not leaving a trace behind.

Why is anonymity important: It's important overall because of how easy it is for someone to get your info just from not using a vpn. You ip and lead to many different site that you have used.

Why you want 143VPN: I read the thread regarding it & I think it can serve my purpose not only that but it is not very expensive too so if I can utilise it properly in the 1 month time then hopefully I'll buy it again

What you will use it for: The main purpose for which I wanted it was to synchronise my Bitcoin, Litecoin & Latium wallets as the college I'm at has blocked almost everything.

Why is anonymity important: Anonymity gives us protection & freedom.

Finding these two together is hard.

My work is not very secretive but I can learn a lot & utilize the power of being completely anonymous in a way so that I get better at it.

EDIT: I just realised that my country isn't listed in the worldwide locations.

I feel bad but no problems maybe some other time as I see you are expanding.

Great contest, I hope the guy needs it the most wins.

Why you want 143VPN: it's a good VPN.

What you will use it for: just tot browse on it.

Why is anonymity important: so people can't hurt you.

Hooded Robin - September 5, 2014, 7:37 am

Why you want 143VPN: Always looking for a good VPN provider to use and recommend to others

What you will use it for: probably random surfing, touch of grey hat fun mixed in, i never know what i will be up to on any given day...

Why is anonymity important: identity is sacred, DNS leaks are a stupid, should be free to surf the net as I please

Curious: Do you fully support IPv6 with your client/service?

Hyptonix - September 5, 2014, 2:04 pm

Why you want 143VPN: Try the service and see if it's as good as people say it is.

What you will use it for: Anonymous browsing.

Why is anonymity important: Who wants their identity stolen? Not me.. that's for sure.

Fish - September 5, 2014, 2:12 pm

Why you want 143VPN: i just need a new vpn and i think that 143VPN would be the best choice and since i can't buy one right now its be best free option. and recommend it to others if it a good VPN thing

What you will use it for: i will use it for browsing on some minecraft websites and use it on the servers, and for anonymous browsing

Why is anonymity important: because i need a VPN to join the website and so that people can't hurt me and get my identity stolen
