I love how i can Just buy gadgets and items I've always wanted to buy without having to use my dad's credit card and having him telling me "dang son why would you buy that that's a waste of money you ain't buying that.".

Will post picture proof as soon as the items arrive. which will take approximately 10 days(for all the items to arrive).

there's no way of getting caught if you're doing what i do. feel free to PM me and i will explain you i guess. I really never thought it was profitable either but then i started doing it and it's really easy money.

My biggest question is that How do you explain this shit to your parents. Lol like I told my mom a friend bought me a pocket knife and she freaked xD

Nice man, good earnings. Have fun with the gadgets.

I can't do eWhoring haha. For me it's pretty weird to do, I can't do that a few hours and then talk with my gf or do things. "Hey baby what did you do today." "Hey, I acted like a girl on the internet to make money."

Hahaha, there is nothing wrong with ewhoring but I don't have the mindset for it.

Anyways, goodluck with future earnings man :D

It's weird to do but I just do it for the money.

Honestly I don't even think about how weird it is. It's like a second life :P.

Also, I'm just doing it to make money to get started with investing. First I'm getting myself some decent gear and some gadgets and when I perfect the method I'm going to start saving the money till I have a decent amount. Then invest it.

But that's the future ;)

That I respect alot. I like people that don't just spend. But scale up :D

God, this method looks promising. If you're ever planning on sharing this method either for free or for a small price, hit me up!
