Great deface nice job, what was the website before?

vortek1919 - August 18, 2010, 5:46 am

did you actually "hack" or just use an existing vulnerability someone else found? I'm not saying its bad

because usually people google for exploits then go attack any random site and call themself hackers.

Lith - August 18, 2010, 5:47 am

Idiot. You always use this deface page. You're calling it the best when all you did was copy and paste your HTML file into a "hacked" site.
