Thread: [sims 4 Released... but not released?](#)

Shaco Bot - September 2, 2014, 6:48 pm

I can't purchase the game (from UK) and there are plenty of people playing it right now...

It says being released on the 5th of September.

Anyone able to help?

NotUsingAnymore - September 3, 2014, 12:41 am

Release dates Microsoft Windows

NA September 2, 2014

EU September 4, 2014

AUS September 4, 2014

UK September 5, 2014

It is common that Americans get a game a few days before EU, however to be honest I don't know why UK has to wait one more day than others.

Basically you will just have to wait a couple days. Or maybe you can try buy it from a place where it has already been released (It have worked with Steam so I think it will also work for Origin). Anyway it is just a couple days, I think you will manage :)

Reckon if I bought it from somewhere (US) & redeemed on my EU, it would work?

They're different regions so it would not work.

I just checked on a CD key site and they say that Sims 4 is a region free game, or at least the keys they sell. So it could possible work :)

However I am not 100% sure, because there may actually be a problem. Since you are in EU it could be that the "account key system" (What ever it is called) would recognize you as an European meaning they may just make it a pre-order until release.

I can't tell for sure, unless of course I try myself. But at the moment I don't really have any intentions of buying Sims 4. Maybe you should wait a bit and see if there are someone else who have tried it :)

I heard it's terrible and a downgrade from TS3. I'm waiting for crack bc 60\$ is too much for half finished game like this

You are into the sims? Would you like a Origin account with like all of the mappacks? (SIMS 3) Not full access.

Has anyone played it yet, I never really played sims 3, so wondering if I should get it?

I have and it's such a downgrade from TS3... they removed a lot of stuff but still you should try it it's newbie friendly

It's alright, keeps crashing for me at the moment though when i try to move out. The social aspect of it is pretty fun as you can do multiple things at the same time for example running on a treadmill and talk to your friend it depends how much you like Sims to be honest, but if you haven't played Sims 3 i'd say just go with Sims 3 for now.

I'm still into the Sims 2 the most.

Never got into #3.
