This looks a lot like the battle.net client for World of Warcraft, Diablo 3, Starcraft, etc? Is that where you got the idea from?

Anyways looks really nice, Good job.

aldypalypso - February 23, 2015, 8:37 am

This theme looks really good, it's just a (big) disappointment that it's only written in VB.

But well, it's for free, and I can always convert it if I want to, so I guess there's no need to complain.
