I have tried iAp Cracker and iAp Free. The game I'm trying to get free stuff on is TrueSkate. Could anyone help me do this

I just tried that one, I even connected to the DNS server that it said to use.

Some applications require a server-side confirmation before they can add the credits. It's often the ones that let you play or save your data online. I've never played this one, and I can't tell for sure.

Try LocalIAPStore.

You can try to find a modded patch on Flex 2.
