Using the Scammer-Database UserScript?
Annoyed by that fat vcw advertisement?

No problemo! Sadly modifying the userscript is not allowed so I quickly made one that removes the advertisement again:

```
Code // ==UserScript==
// @name      Remove ScammerDatabase Ad
// @version    0.1
// @description Removes the gay advertisement
// @include    *hackforums.net/*
// @copyright  2014+, Razor
// ==/UserScript==

var annoying = document.getElementById('xero_message_4');
if (annoying) {
    annoying.parentNode.removeChild(annoying);
}
? Razor
```

I just noticed it, first I though it was an HF advertisement.

Thanks!

edit: It doesn't seem to be working?

LOL, I didn't know about the advertisements. I don't use it but I'm sure that it'll help a lot of people.
