Thread: [How to make a animated loading bar Photoshop \(CS6 Extended\)](#)

?vol - September 4, 2014, 11:56 am

Thread design's quality shrunk like hell, but it get's the idea across if you wish to do this in photoshop...

SoPhresh - September 4, 2014, 4:37 pm

Great work, although not sure the black background goes well with the blue. Maybe a different color for the background or even no BG at all.

YEAH!. i totally agree man, i made this tutorial on my laptop, not my custom PC. so sorry to everyone about the slack in thread designing, etc. i just wanted to TRY and get the idea acrossed. but yeah!. i was gonna make it no background, but i was too lazy to go back and change the tutorial, when i had got that far. xD. thanks man.

Nice tutorial, and thanks for the valuable info, but I already knew about this, maybe the colour combination could have been different, otherwise great job man ?
