Thread: [\[1.8x\] 18MySkins Free MyBB Theme for MyBB 1.8 Version](#)

envira - September 4, 2014, 12:29 pm

Hello guys,

Its really great moment to announce that MyBB 1.8 Version was out a few days ago. So i decided to bring forth a simple, classy theme to dress the newly upgraded forums. I always wanted to bring out themes accessible to every person, free one's, which power lots of websites and thus earn a name for me. Henceforth, i worked on a pretty cool, colored, with custom elements, a theme called "18MySkins".

The best part is, the theme is available for free to download at our MySkins.

Features :

The theme is made with Css3 and jQuery elements.

Custom Font Family (Source-sans) and FontAwesome icons are included.

Tabbed profiles, Css3 main nav and Usernav.

Css Breadcrumbs etc.
